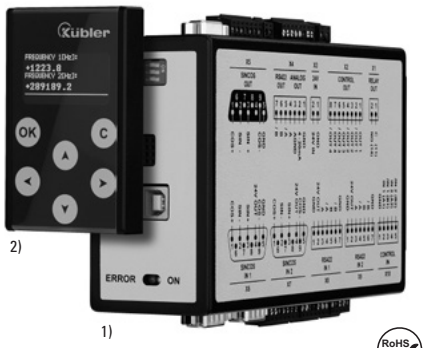
Safety-M compact Basic module | Speed monitoring – SMC1.1 | 1 axis / 1 encoder system



2)

1)

SMC1.1 is a compact safety module of the Safety-M family with integrated drive monitoring for one axis with a safe encoder system. This standalone speed controller (basic module) can be operated without additional safe PLC.

Safety-M compact is the optimal solution for integration in existing safety circuits or for retrofitting old machines. Solutions with a safe encoder (SinCos) are supported for safe speed acquisition.

The integrated signal converter and splitter allows an easy connection of controllers, which can operate using the same encoder system. It offers in addition the possibility of issuing an analog rotational speed value, e.g. to replace tachometers or similar.

The device can be parameterized with a removable control and diagnostic display or with the PC software SafeConfig OS6.0. This way, setting and diagnostic can be performed conveniently at the office PC or totally and easily using the intuitive touchpad display in the field.

- Extensive library of pre-configured safe sensors and command devices. This allows easy parameterizing without programming.
- Complete range of speed-related safe drive monitoring functions equivalent to EN 61800-5-2 already integrated in firmware (e.g. STO, SS1, SS2, SOS, SLS, SSM, SDI).
- Integrated signal splitter for SinCos signal forwarding (optional). No complex, interference-sensitive external wiring when the controller is to use the same signals.
- The signal converter can issue the encoder signal as SinCos, TTL/RS422 or as a 4 ... 20 mA analog value.
- Snap-on installation on 35 mm C profile rail.
- 4/2 safe input lines, 8/4 safe shut-off channels, 1 safe potential-free relay open contact.
- Contact multiplication or increase of power capability by external contactors in connection with the device-internal monitoring function for external contacts (EDM).
- LED on the front side indicates operating state.
- Removable control and diagnosis display (optional).
- Free “SafeConfig” parameterization software.

Technical data

General data	
Digital input lines	4 / 2
Digital output lines	8 / 4
Safe relay outputs	1
Type of connection	pluggable screw terminals
Max. terminal cross section	1.5 mm² [AWG 15]
Drive monitoring - number of axis	1 axis

Electrical characteristics	
Power supply	24 V DC / 2.5 A
Tolerance	±20 %
Current consumption (no load)	max. 150 mA
Power consumption	max. 45 W
Fuse on power supply	max. 2.5 A, medium time-lag
Rated encoder power supply data	approx. 2V below the supply voltage / max. 200 mA

Environmental data	
Operating temperature	-20°C ... +55°C [-4°F ...+131°F]
Storage temperature	-25°C ... +70°C [-13°F ...+158°F]
Protection acc. to EN 60529	IP20
Climate class	3 acc. to DIN 50178 (non condensing)
