

**Date: March 15, 2014**  
**To: Bussmann REN and RES Renewable Fuse Customers**  
**Subject: End-of-Life Notice**

Dear Valued Customer:

Effectively immediately, Eaton's Bussmann Business has discontinued the 70-600 amp ratings of the Bussmann branded non-current limiting 250V REN and 600V RES Class H renewable fuses.

This End-of-Life notice also applies to the 250V 450-600 amp ratings and 600V 70-600 amp ratings of the Karp and Mercury branded fuses sold in Mexico and South America.

To support the existing installed fuse base, Bussmann will continue to make available the replacement fuse links for all fuse amp ratings covered by this End-of-Life notice.

All inventory of existing product is still saleable product and should not be returned.

Orders for the affected part numbers will be accepted until May 31, 2014, or until inventory is depleted.

Eaton's Bussmann Business recommends that renewable Class H 250V REN fuses be replaced with Class RK5 250V FRN-R fuses and Class H 600V RES fuses be replaced with Class RK5 FRS-R fuses. The table on the following page lists the discontinued REN and RES part numbers, UPCs and their recommended FRN-R and FRS-R replacements.

The FRN-R and FRS-R Fusetron™ energy efficient Class RK5 fuses have superior current-limitation performance and feature 200kA interrupting ratings at a comparable price. Although the Class RK5 are rejection fuses, they will fit into Class H fuse blocks and switches so there is no need for any retrofitting of existing installations.

Thank you for your support of the Bussmann by Eaton brand of circuit protection products. Should you have any questions regarding this End-of-Life notice, please contact your local Eaton's Bussmann Business representative, or call toll free 855-BUSSMANN (287-7626) to reach our Customer Satisfaction Team or Application Engineering Department.

Best Regards,

Nick Offerman  
Product Manager  
Eaton's Bussmann Business
