VEO

TIME RELAY / MULTIFUNCTION TIME RELAY

V2ZM10 12-240V AC/DC

Art.Nr.: 125100

V2ZM10P 12-240V AC/DC

Art.Nr.: 125600

- 10 functions
- 10 time ranges
- Supply voltage 12-240 V AC/DC
- 1 change-over contact
- Width 22.5mm

Control elements

- Fine adjustment
- Setting of time range
- Function selector

Status indication

- LED U/t: Supply voltage
- LED R: Relay status

TECHNICAL DATA

SUPPLY CIRCUIT		
Terminals		A1-A2
Supply voltage		12 ... 240V AC/DC
Supply voltage tolerance		-10 / +10 %
Rated frequency		50 / 60Hz or DC
Rated frequency tolerance		48 ... 63Hz
Rated consumption	230 V AC	typ. 0,4 W / 0,75 VA
	24 V DC	typ. 0,25 W / 0,25 VA
Standby consumption	230 V AC	typ. 0,16 W / 0,3 VA
	24 V DC	typ. 0,03 W / 0,09 VA
Duty-cycle		100%
Backup power time		< 30 ms
Recovery time		> 100 ms
Drop-out voltage		≥ 7 V

CONTROL INPUT		
Terminals		A1-B1
Function		start of function
Type		voltage controlled
Control voltage		see supply voltage
Minimum control pulse length	AC	min. 50 ms
	DC	min. 25 ms
Loadable		yes

V2ZM10 12-240V AC/DC
Art.Nr.: 125100

V2ZM10P 12-240V AC/DC
Art.Nr.: 125600

TIMING CIRCUIT

Time ranges	10	0,05 ... 1 s
		0,15 ... 3 s
		0,5 ... 10 s
		1,5 ... 30 s
		3 ... 60 s
		9 ... 180 s
		0,5 ... 10 min
		3 ... 60 min
		0,5 ... 10 h
		5 ... 100 h

RANGE OF FUNCTIONS

Functions	10	E, R, Wu, Es, Ws, Wa, Ec, Bp, Bi, Wt

STATUS INDICATION

Supply voltage / time lapse	LED U/t (green) on	supply voltage applied
	LED U/t (green) flashes	indication of lapse of time
Relay status	LED R (yellow) on	output relay energized

OUTPUT CIRCUIT

Terminals		15-16-18
Kind of output		Relay
Number of contacts	change-over contact	1
Contact material		AgNi
Rated voltage (IEC 60947-5-1)		250V
Maximum switching voltage		400V AC
Minimum switching voltage / switching current		12 V / 10 mA
Rated current (IEC 60947-5-1)	AC-1	8 A / 250 V
	AC-15	1,5 A / 240 V (B300)
	DC-12	8 A / 24 V
	DC-13	0,1 A / 250 V
Endurance	mechanical	30 x 10^6 switching cycles
	electrical (AC-1)	100 x 10^3 switching cycles
Rated frequency of operation	with load	6/min
	without load	1200/min
Fuse rating		8 A fast acting

V2ZM10 12-240V AC/DC
Art.Nr.: 125100

V2ZM10P 12-240V AC/DC
Art.Nr.: 125600

ACCURACY

Base accuracy		< 1 % (of full scale)
Setting accuracy		< 5 % (of full scale)
Repeat accuracy		< 0,5 % or ±5 ms
Temperature influence		< 0,01 % / °C
Voltage influence		-
Frequency influence		-

ENVIRONMENTAL CONDITIONS

Ambient temperature	operation	-25 ... +60°C
	storage	-40 ... +70°C
Relative humidity		5 ... 95 %
Vibration	EN 61812-1	10 ... 60 Hz: 0,15 mm; 60 ... 150 Hz: 20 m/s^2
	EN 60947-1	2 ... 13,2 Hz: 1 mm; 13,2 ... 100 Hz: 7 m/s^2
Shock	EN 60947-1	±150 m/s^2 11 ms

GENERAL DATA

Dimensions	W × H × D	22,5 × 67 × 76 mm
Mounting		DIN rail (EN60715)
Mounting position		any
Housing material		PA 66, self-extinguishing plastic, class V-0
Degree of protection	housing	IP40
	terminals	IP20
Electrical connection	V2ZM10	Screw terminal
Wire size	flexible with wire end ferrule	0,5 ... 2,5 mm^2 (20 AWG ... 13 AWG)
	flexible without wire end ferrule	0,5 ... 4 mm^2 (20 AWG ... 12 AWG)
	rigid	0,5 ... 4 mm^2 (20 AWG ... 12 AWG)
Stripping length		8 mm
Tightening torque		max. 1Nm
Electrical connection	V2ZM10P	Push-in terminal
Wire size	flexible with wire end ferrule	0,25 ... 1,5 mm^2 (24 AWG ... 16 AWG)
	flexible with plastic ferrule	0,25 ... 0,75 mm^2 (24 AWG ... 19 AWG)
	flexible without wire end ferrule	0,2 ... 1,5 mm^2 (24 AWG ... 16 AWG)
	rigid	0,2 ... 1,5 mm^2 (24 AWG ... 16 AWG)
Stripping length		8 mm

V2ZM10 12-240V AC/DC
Art.Nr.: 125100

V2ZM10P 12-240V AC/DC
Art.Nr.: 125600

GENERAL DATA		
MTTF		-
Weight		85 g

ISOLATION DATA		
Pollution degree (IEC 61812-1)		2
Overvoltage category (IEC 61812-1)		III
Rated insulation voltage (IEC 61812-1)	supply circuit / output cicuit	300 V
Rated impulse withstanding voltage (IEC 61812-1)	supply circuit / output cicuit	6 kV
Insulation test voltage (IEC 61812-1)	supply circuit / output cicuit	3200 V
Degree of protection	supply circuit / output cicuit	protective separation

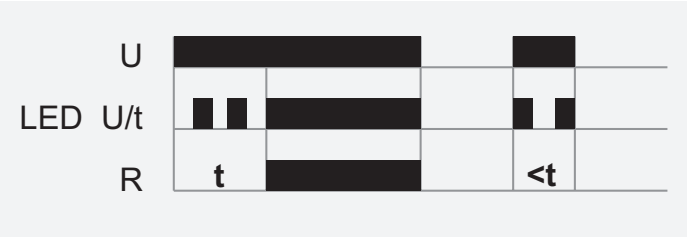
STANDARDS		
Product standard		IEC 61812-1
Interference immunity	IEC 61812-1	class A
Interference emission	IEC 61812-1	class A
Approvals		

V2ZM10 12-240V AC/DC
Art.Nr.: 125100

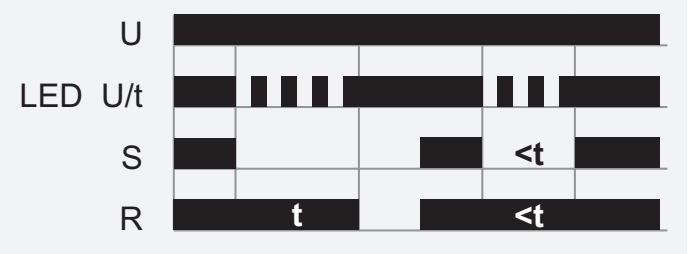
V2ZM10P 12-240V AC/DC
Art.Nr.: 125600

FUNCTIONS

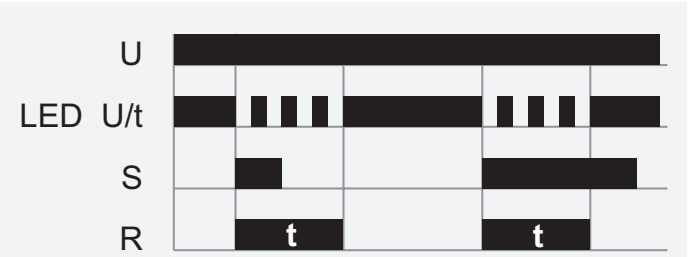
ON delay (E)
When the supply voltage U is applied, the set interval t begins (green LED U/t flashes). After the interval t has expired (green LED U/t illuminated) the output relay R switches into on-position (yellow LED illuminated). This status remains until the supply voltage is interrupted. If the supply voltage is interrupted before the expiry of the interval t, the interval already expired is erased and is restarted when the supply voltage is next applied.



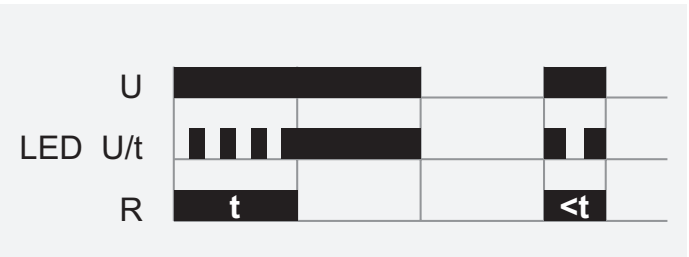
OFF delay with control input (R)
The supply voltage U must be constantly applied to the device (green LED U/t illuminated). When the control contact S is closed, the output relay R switches into on-position (yellow LED illuminated). If the control contact is opened, the set interval t begins (green LED U/t flashes). After the interval t has expired (green LED U/t illuminated) the output relay switches into off-position (yellow LED not illuminated). If the control contact is closed again before the interval t has expired, the interval already expired is erased and is restarted.



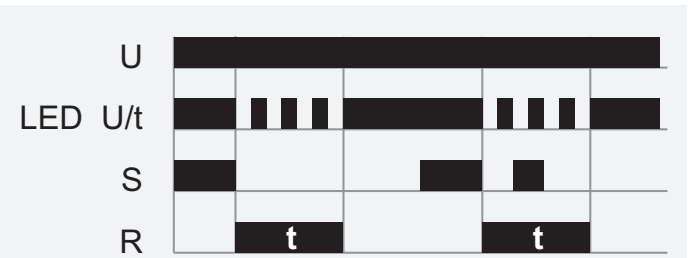
Single shot leading edge with control input (Ws)
The supply voltage U must be constantly applied to the device (green LED U/t illuminated). When the control contact S is closed, the output relay R switches into on-position (green LED U/t illuminated) and the set interval t begins (green LED U/t flashes). After the interval t has expired (green LED U/t illuminated) the output relay switches into off-position (yellow LED not illuminated). During the interval, the control contact can be operated any number of times. A further cycle can only be started when the cycle run has been completed.



Single shot leading edge voltage controlled (Wu)
When the supply voltage U is applied, the output relay R switches into on-position (yellow LED illuminated) and the set interval t begins (green LED U/t flashes). After the interval t has expired (green LED U/t illuminated) the output relay switches into off-position (yellow LED not illuminated). This status remains until the supply voltage is interrupted. If the supply voltage is interruted before the interval t has expired, the output relay switches into off-position. The interval already is erased and is restarted when the supply voltage is next applied.



Single shot trailling edge with control input (Wa)
The supply voltage U must be constantly applied to the device (green LED U/t illuminated). Closing the control contact S has no influence on the condition of the output R. When the control contact is opened, the output relay switches into on-position (yellow LED illuminated) and the set interval t begins (green LED U/t flashes). After the interval t has expired (green LED U/t illuminated), the ouput relay switches into off-position (yellow LED not illuminated). During the interval, the control contact can be operated any number of times. A further cycle can only be started when the cycle run has been completed.



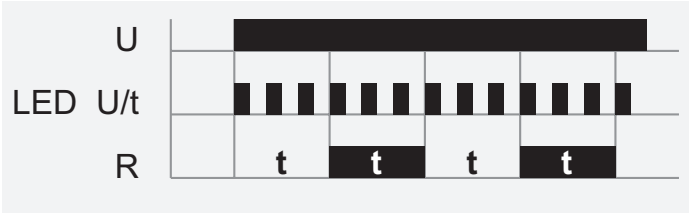
V2ZM10 12-240V AC/DC
Art.Nr.: 125100

V2ZM10P 12-240V AC/DC
Art.Nr.: 125600

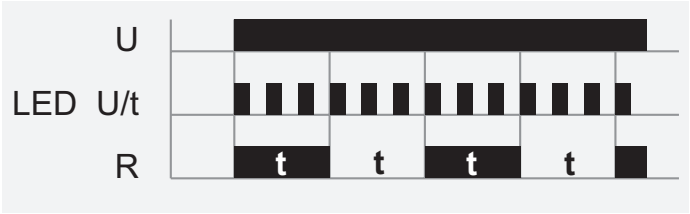
FUNCTIONS

ON delay with control input (Es)
The supply voltage U must be constantly applied to the device (green LED U/t illuminated). When the control contact S is closed, the set interval t begins (green LED U/t flashes). After the interval t has expired (green LED U/t illuminated) the output relay R switches into on-position (yellow LED illuminated). This status remains until the control contact is opened again. If the control contact is opened before the interval t has expired , the interval already expired is erased and is restarted with the next cycle.

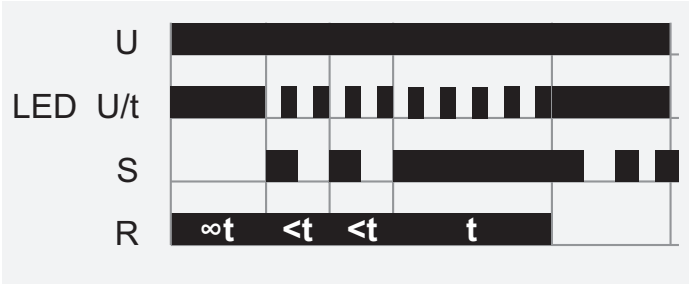
Flasher pause first (Bp)
When the supply voltage U is applied, the set interval t begins (green LED U/t flashes). After the interval t has expired, the output relay R switches into on-position (yellow LED illuminated) and the set interval t begins again. After the interval t has expired, the output relay switches into off-position (yellow LED not illuminated). The output relay is triggered at a ratio of 1:1 until the supply voltage is interrupted.



Flasher pulse first (Bi)
When the supply voltage U is applied, the output relay R switches into on-position (yellow LED illuminated) and the set interval t begins (green LED U/t flashes). After the interval t has expired, the output relay R switches into off-position (yellow LED not illuminated) and the set interval t begins again (green LED U/t flashes). The output relay is triggered at a ratio of 1:1 until the supply voltage is interrupted.



Pulse sequence monitoring (Wt)
When the supply voltage U is applied (green LED U/t illuminated), the output relay R switches into on-position (yellow LED illuminated). When the control contact S is closed, the set interval t begins (green LED U/t flashes). So that the output relay R remains in on-position, the control contact S must be opened and closed again within the set interval t. If this does not happen, the output relay R switches into off-position and all further pulses at the control contact are ignored. To restart the function the supply voltage must be interrupted and re-applied.



Additive ON Delay (Ec)
When the supply voltage U is applied, the release for the interval starts (green LED U/t illuminated). When the control contact S is closed, the set interval t begins (green LED U/t flashes). If the control contact S is opened during the set interval t, the interval stops (green LED U/t illuminated), and the already expired interval is stored. During the lapse of time the control contact can be opened or closed as often as required. If the sum of the periods, in which the control contact S is closed reaches the set interval t the output relay R switches into on-position (yellow LED R illuminated). The interval is stopped (green LED U/t illuminated) and a further activation of the control contact S remains without effect. By interrupting the supply voltage, the device will be reset. A possibly expired time t is deleted.
