

The RDJ100RF/SET consists of a RDJ100RF wireless temperature controller and a RCR100/433 receiver. The RDJ100RF allows you to set the desired room temperature (setpoint) for the desired time. The unit features an ergonomic setting knob for easy temperature control.

Display	
	Actual room temperature in °C
	The unit controls to the selected comfort temperature
	The unit controls to the selected energy saving temperature
	The unit controls to the frost protection temperature at 5 °C
	Indicates when the temperature setpoint was changed by the user. This setpoint will be maintained until the next switching time. This function is only active in automatic mode and comfort mode
	Indicates when heating is demanded
	Replace batteries
	Frost protection: The unit controls continuously to the frost protection temperature at 5 °C
	Energy saving mode: The unit controls continuously to the energy saving temperature
	Comfort mode: The unit controls continuously to comfort temperature
	Automatic mode: The unit controls to the selected time and temperature programs.

**Setting knob**  
Warmer / colder for selecting the temperature

**Battery compartment**  
2 alkaline batteries type AA, 1.5 V

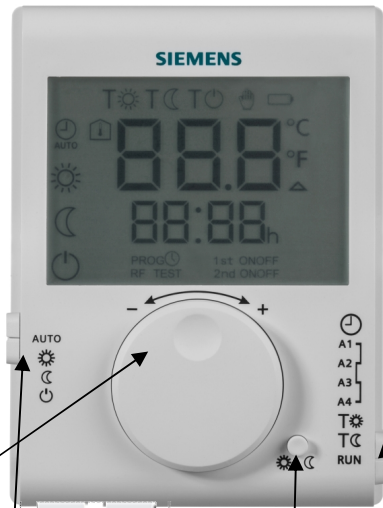

**Operating mode selector**  
This slider determines how the thermostat operates

AUTO	Automatic mode: In this position the thermostat switches at the programmed times and temperatures
	In this position the thermostat ignores all programmed times and runs permanently at the temperature set in
	In this position the thermostat ignores all programmed times and runs permanently at the temperature set in
	Frost protection Thermostat runs permanently at 5 °C

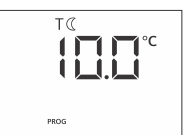

**Advance button**  
Switches the operating mode from comfort to energy saving, or vice versa, until the next switching time in automatic mode

**Programming selector**

	Time setting position
A1	First switch on time
A2	First switch off time
A3	Second switch on time
A4	Second switch off time
	Comfort (ON) temperature setting
	Energy saving (OFF) temperature setting
RUN	Set the controller to RUN after programming is completed

	<p><b>Commission</b></p> <ul style="list-style-type: none"> <li>Remove the black transit tabs from the alkaline batteries.</li> <li>Check to see if the battery compartment is in the correct position.</li> <li>If no batteries are inserted, fit 2 alkaline batteries type AA in the battery compartment.</li> </ul>
	<p><b>Set clock</b></p> <ol style="list-style-type: none"> <li>Move the programming selector to position </li> <li>The current time setting flashes.</li> <li>Turn the setting knob counterclockwise - to decrease the time, or clockwise + to increase the time.</li> <li>When the correct time is displayed move the programming selector to any other position to confirm your setting.</li> </ol>

**Front View Receiver**

**LED Signal Indicator**  
The signal is good when the LED is solid green.  
A solid red LED indicates that there is no signal.

**LED Relay Indicator**  
Orange LED indicates relay is on.

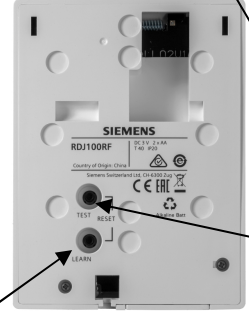

**OVERVERRIDE Button \***  
Press this button to manually switch on or off

**RESET: Press the LEARN & OVERVERRIDE button for 4 seconds to delete all transmitter addresses.**

**LEARN Button**  
Press the button to put into learn mode

**TEST Button**  
Used for testing transmission.

**Rear View Room Unit (Transmitter)**  
Mounting plate must be removed to get access to the back!

**Learn Button**  
Press and then release to learn    Press > 5 s to enter telegram parameter mode

<p><b>Configuration instructions for the Siemens RDJ100RF/SET</b></p> <p>The transmitter RDJ100RF and the receiver RCR100/433 are set to communicate (paired) with each other at the factory. If they fail it is necessary to re-pair the units due to the loss of communication, please follow the below instructions.</p> <ol style="list-style-type: none"> <li>Reset receiver by simultaneously pressing the LEARN &amp; OVERVERRIDE button for 4 seconds.</li> <li>Press and release the LEARN button. This sets the receiver to the learn mode.</li> <li>Press and release the LEARN button on the back of the transmitter.</li> <li>A green flashing or solid LED indicates a good signal, a red flashing or solid LED indicates no signal.</li> <li>To test transmission, press the TEST button on the transmitter, switches the relay on in the receiver regardless of temperature. The RF TEST symbol appears on the thermostat display.</li> <li>An orange LED indicates that the relay is on.</li> </ol>

	<p>Once the display shows alternating "SEr" and days until service is due, then the boiler service need to be arranged accordingly. The days until next service is due can also be seen whenever switching to and from Frost protection.</p>
	<p>Display shows alternating "SEr...duE" indicates that the service day has expired. Thermostat can still be fully operated but warning remains until boiler service is done.</p>
	<p>Display shows alternating "SEr...duE" and "OFF" indicates that the service day has expired and the thermostat is switched off. The thermostat can only be operated in Comfort mode for 60 minutes whenever turning the knob or pressing the advance button.</p>

### Parameter setting

**Parameter setting mode**

1. Press LEARN on the rear for 5 seconds until "P01" appears.
2. Press advance button and the parameter value on second line flashes and is ready for adjustment.
3. Adjust the parameter using setting knob.
4. Press advance button once to confirm the setting.
5. Rotate the setting knob clockwise to next parameter and repeat steps 2 to 4.
6. Exit parameter setting mode by rotating the setting knob clockwise to "End" and pressing advance button once.

**Parameters:**

- **P01** Control behaviour: 2-position 1K / 2-position 0.5 K / PID fast / PID slow (factory-setting)
- **P02** Maximum temperature range
- **P03** Minimum temperature range
