HTU418B
STANDARD ultrasonic sensors with 1 switching output

- Largely surface-independent function, ideal for the detection of liquids, bulk materials, transparent media, ...
- Small dead zone at long range
- Adjustment of the switching point can be taught
- NO/NC function reversible
- 1 switching output (PNP)
- Extra short construction
- NEW - Stable all-metal design

## Accessories:

(available separately)

- Mounting systems
- Mounting adapter M18-M30: BTX-D18M-D30 (Part no. 50125860)
- Cables with M12 connector (KD ...)
- Teach adapter PA1/XTSX-M12 (Part no. 50124709)

3) Target: plate $100 \mathrm{~mm} \times 100 \mathrm{~mm}$
4) Target: plate $100 \mathrm{~mm} \times 100 \mathrm{~mm}$
5) Of full scale value
6) For UL applications: for use in class 2 circuits according to NEC only
7) Not applicable for Type HTU418B-1000 / 4TX-M12P2 (50130241)
8) The ceramic material of the ultrasonic transducer contains lead zirconium titanate (PZT)
9) $1=$ short-circuit and overload protection, $2=$ polarity reversal protection, $3=$ wire break and inductive protection
10) These proximity switches shall be used with UL Listed Cable assemblies rated 30V, 0.5 A min, in the field installation, or equivalent (categories: CYJV/CYJV7 or PVVA/PVVA7)
11)Ambient temperature $85^{\circ} \mathrm{C}$. Use same supply source for all circuits.

## Deviating Specifications for HTU418B-1000 / 4TX-M12P2

Customer-specific parameterization with the following characteristics:

- Dead zone:
- Switching point: 350 mm
- Switching hysteresis: set to 560 mm on delivery
- Switch-on/Switch-off delay: 1.8 s
- No adjustment of the switching function (NC/NO) via the teach input

## Device functions and indicators

All sensor settings are taught via the Teach-IN input. Device status and switching states are indicated by a green and a yellow LED as follows:

## Adjusting the switching point via the teach input

The switching point of the sensor is set to $400 \mathrm{~mm}, 700 \mathrm{~mm}$ or 1000 mm on delivery.
By means of a simple teach event, the switching point can be taught to an arbitrary distance within the scanning range. The Leuze PA1/XTSX-M12 teach adapter can be used for this purpose. The adapter can also be used to easily switch the output function from NO contact to NC contact.

## 1-point teach

1. Place object at desired switching distance.
2. For the adjustment of output OUT1, connect input Teach-IN to GND for $\mathbf{2} \ldots \mathbf{7 s}$ (Leuze teach adapter: position "Teach-GND").

The current state of output OUT1 is frozen during the teach event.
3. The yellow LED flashes at 3 Hz and then remains on.

The current object distance has been taught as the new switching point.
4. Error-free teach: LED states and switching behavior according to the diagram shown above.

Faulty teach (object may be too close or too far away - please note scanning range):
yellow LED flashes at 5 Hz until an error-free teach event is performed.
The output OUT1 is inactive as long as there is a teach error.

## Adjusting the switching function (NC/NO) via the teach input 1)

The switching function of the sensor is set to normally open (NO) on delivery.
If the switching function is changed, the switching output is changed to the opposite state (toggled).

## Changeover of the switching function

1. To change the switching function, connect input Teach-IN to $\mathrm{U}_{\mathrm{B}}$ for $\mathbf{2} \ldots \mathbf{7 s}$ (Leuze teach adapter: position "Teach- $\mathrm{U}_{\mathrm{B}}$ ").

The current state of output OUT1 remains frozen while the adjustment is performed.
2. The green and yellow LED flash alternately at 2 Hz .

The switching function has been reversed.
The switching behavior corresponds to the diagram shown above.

## Notice!

Please note that pin 2 and pin 5 are connected internally. The switching point is taught when GND is connected, and the output function is reversed when $\mathrm{U}_{\mathbf{B}}$ is connected due to the configuration of the input.
If no sensor action is desired, pin $\mathbf{2}$ and pin 5 must remain unconnected!

1) Not applicable for Type HTU418B-1000 / 4TX-M12P2 (50130241)
