GEFRAN

THE ACKNOWLEDGED INTERNATIONAL LEADER

Thanks to forty years of experience, GEFRA is the world leader in the design and production of solutions for **measuring, controlling, and driving industrial production processes.**

We have branches in 14 countries and a network of over 80 worldwide distributors.

QUALITY AND TECHNOLOGY

Gefran components are a **concentrate of technology**, the result of constant research and of **cooperation with major research centres.**

For this reason, GEFRA is synonymous with **quality and expertise in the design and production of:**

- **sensors** for measuring main variables such as **temperature, pressure, position and force**
- **state-of-the-art components and solutions for indication and control**, satisfying demands for optimisation of processes and intelligent management of energy consumption
- **automation platforms** of various complexities
- **electronic drives and electric motors** in AC and DC for all industrial automation, lift, and photovoltaic needs.

Gefran's know-how and experience guarantee continuity and tangible solutions.

PERFORMANCE

In addition to foreseeing the market's application needs, Gefran forms partnerships with its customers to find **the best way to optimise and boost the performance of various applications**. Gefran products communicate with one another to provide integrated solutions, and can dialogue with devices by other companies thanks to compatibility with numerous fieldbuses.

SERVICES

PRE AND POST SALES

A team of Gefran experts works with the customer to select the ideal product for its application and to help install and configure devices (customer care@gefran.com).

TRAINING

Gefran offers a wide range of courses at different levels for the technical-commercial study of the Gefran product range as well as specific courses on demand.

UNIVERSAL TEMPERATURE INDICATOR - ALARM UNIT

Universal indicator - alarm unit, 4-digit display, microprocessor-based, configurable from faceplate keys and from PC, temperature and linear inputs.

- Inputs TC, RTD, PTC, NTC, mV, V, mA linear inputs
- Retransmitted output
- Faceplate protection: IP65
- Configurable alarms
- RS485 serial line

Basic version with two output relays
(output 1, output 2 = 2R)

MONOPHASE SOLID STATE POWER UNITS WITH HEATSINK

Monophase solid state power unit for resistive loads, complete with heatsink; "zero crossing" firing to drive double SCR connected in antiparallel. Logic control in VDC and VAC. DIN rail attachment.

- Control logic input 3- 32VDC; 20-260VAC
- Front Panel Protection: IP20
- Load Interrupt Protection
- Over-temperature and interrupted load alarm function
- Integrated Heatsink
- Nominal Operating Temperature 40°C
- Nominal load voltages 230VAC, 480VAC, 600VAC

Monophase connection

SOLID STATE POWER UNIT WITH LOGIC CONTROL AND DIAGNOSTICS

Zero crossing monophase solid state power unit with VDC logic control for resistive loads, with diagnostics for interrupted load (Hb function) and alarm output. Complete with aluminium heatsink and DIN rail attachment. Optional overtemperature protection.

- Control logic input 3- 32VDC
- Faceplate protection: IP20
- Load interrupt protection
- Overtemperature function alarm
- Integrated heatsink
- Nominal working temperature 40°C

CONFIGURABLE POWER CONTROLLERS WITH SERIAL COMMUNICATION IN MODBUS RTU

Modular monophase power controller with heatsink, 25A / 480VAC (25A at 40°C, voltage range 90 - 530 VAC). Control inputs: digital, programmable analog V, I, Potentiometer. Firing type configurable for: ZC "zero crossing", BF "burst firing", HSC "half single cycle", PA "phase angle".

- Configurable analog control input (0- 10V, 4- 20mA)
- Faceplate protection: IP20
- Overvoltage protection
- Overtemperature function alarm
- Current V, I, P limit
- Modbus RTU digital communication
- Integrated fuse
- PID temperature control function
- Nominal working temperature 40°C

CONFIGURABLE MODULAR POWER CONTROLLERS WITH FIELDBUS COMMUNICATION

Monophase power controller with heatsink, 40A/480VAC (40A at 40°C, voltage range 90-480VAC). Control inputs: digital, programmable analog V, I, Potentiometer. Firing type configurable for: ZC "zero crossing", BF "burst firing", HSC "half single cycle", PA "phase angle". Modbus RTU communication.

- Configurable analog control input (0- 10V, 4- 20mA)
- Faceplate protection: IP20
- Overvoltage protection
- Overtemperature function alarm
- Current V, I, P limit
- Modbus RTU digital communication

SOLID STATE INVERTER FOR 3-PHASE MOTORS, WITH LOGIC CONTROL

Zero crossing 3-phase solid state relay with VDC logic control, for 3-phase asynchronous motors up to 3 x 6A (AC53) at 400VAC. Protection against overvoltage and control signal polarity inversion.

- Control logic input 5- 32VDC
- Faceplate protection: IP20
- Overvoltage protection
- Overtemperature function alarm
- Nominal working temperature 40°C

High-performance versions

GFX4

4-ZONE MODULAR POWER CONTROLLER

Stand-alone unit for independent control of four PID control loops, complete with SSR and current transformer (TC). Suitable for monophase or 3-phase electric heating systems (30, 60, 80kW, 16-32-40A).

- Configurable analog control input (0-10V, 4-20mA)
- Faceplate protection: IP20
- Overvoltage protection
- TC input load interrupt protection
- Overtemperature function alarm
- Modbus RTU digital communication
- Integrated fuse
- Integrated heatsink
- Nominal working temperature 40°C
- Fieldbus connection

GFX4-IR

4-ZONE MODULAR POWER CONTROLLER FOR INFRARED LAMPS AND INDUCTIVE LOADS

Stand-alone unit for independent control of four control loops, complete with SSR, current transformer (TC), volumetric transformers (VT).

Suitable for loads such as infrared lamps (long-wave, medium-wave, short-wave) and mono-phase and 3-phase transformer primaries. Available with configurable functions: firing with zero crossing, pulse train, half single cycle, phasing, delay on first cycle, soft start, current limits, voltage feedback, power feedback.

• **Configurable analog control input (4-20mA)**

Faceplate protection: IP20

- Overvoltage protection
- TC input load interrupt protection
- Overtemperature function alarm
- Current V, I, P limit
- Modbus RTU digital communication
- Integrated fuse
- PID temperature control function
- Integrated heatsink

LINEAR POSITION TRANSDUCER WITHOUT ROD

100 to 2000mm stroke. Mechanical drag with threaded M5 rod. Independent linearity up to $\pm 0.05\%$. Repeatability 0.01mm; infinite resolution. No variation of electrical output signal outside theoretical electrical stroke.

Max. displacement speed 10m/s. Working temperature: $-30...+100^{\circ}\text{C}$. Life: $> 25 \times 10^6$ m strokes, or $> 100 \times 10^6$ operations. IP40 protection rating.

- **IP40 protection rating**
- **Version: anodized aluminium case, 38x39.2mm, sliding cursor**
- **Electrical connection: EV DIN43650 electrovalve connector**

MK4-A

CONTACTLESS LINEAR POSITION TRANSDUCER WITH ANALOG OUTPUT

Contactless linear position transducer with ONDA magnetostrictive technology. The absence of electrical contact on the cursor eliminates wear and guarantees almost unlimited life. Compact size for simple installation. Full protection against outside agents for use in harsh environments with high contamination and presence of dust. Excellent linearity, repeatability, resistance to mechanical vibrations and shocks.

- IP67 protection rating
- Version: Profile in anodized aluminium, 32x28.3mm

ONP1-A

CONTACTLESS MAGNETOSTRICTIVE LINEAR POSITION TRANSDUCER

(ONDA TECHNOLOGY) Analog output

Linear position transducer with GEFTRAN'S innovative ONDA magnetostriuctive technology for long life- The absence of electrical contact on the cursor eliminates wear and guarantees almost unlimited life.
Gefran's patented ONDA technology achieves a compact, modular structure for simple installation.

- **Protection IP65**
- **Version: ProWire in aluminium housing 33x16,3mm**
- **Electrical connection: EV DIN43650 Electrovalve connector**

LINEAR POSITION TRANSDUCER WITH CYLINDRICAL CASE, IP67 PROTECTION RATING

25 to 300mm stroke. Mechanical fixing with brackets or self-aligning joints. Independent linearity up to $\pm 0.05\%$; infinite resolution. No variation of electrical output signal outside theoretical electrical stroke. Max. displacement speed 5 m/s.
Working temperature: -30...+100°C. Life: > 25x10⁶ m strokes, or > 100x10⁶ operations, whichever is smaller (within the EU). IP67 protection rating.

TPFADA

PRESSURE TRANSMITTER WITH FLUSH DIAPHRAGM AND DIGITAL AUTOZERO

Range: from 0...10 to 0...1000bar (0...150 to 0...15000psi).
Accuracy: 0.2% over 50 bar.
Entirely in stainless steel.
Compact version, $\varnothing$ 26.5 mm.
Hex connection.
Calibration signal generated internally (V, P, F only).
Autozero and Digital Span with magnetic pen (span for V, P, F only).

- Flush diaphragm

P – 7-pin connector

Male connector 09-127-09-07
IP67 protection rating

V – 6-pin connector

Male connector VPT02A10-6PT2

MELT PRESSURE TRANSDUCER WITH 3.33mV/V OUTPUT

Gefran M3 Series Melt sensors are pressure transducers designed for use in high-temperature environments. They can read medium pressure up to **400°C**. The constructive principle is based on hydraulic transmission of the pressure; mechanical stress is transferred by means of a non-compressible transmission fluid. Extensimetric technology converts the physical quantity into an electrical signal.

MELT PRESSURE TRANSDUCER WITH 2.5mV/V OUTPUT

Gefran M2 Series Melt sensors are pressure transducers designed for use in high-temperature environments. They can read medium pressure up to **400°C**. The constructive principle is based on hydraulic transmission of the pressure; mechanical stress is transferred by means of a non-compressible transmission fluid. Extensimetric technology converts the physical quantity into an electrical signal.

Cell connection in parallel

In connections with cells in parallel, you can connect cells with the same nominal load by following the diagram shown in the figure. In this way, the device will have the nominal sensitivity of a single cell when the sum of the maximum applicable loads of the individual cells is applied to it. In this type of use, the load acting on the single cell cannot be determined; the user must therefore ensure that no transducer is stressed beyond its full-scale value in each load condition.

Connector and cable color code with prewired female connector.

The amplifiers are supplied with VPT07RA10-6PT2 male connector as standard. The function of individual pins varies according to output type, as shown in the boxes for versions B, C, E, M, and N.

* In version Z only (maximum length of wires for calibration signal: 2 metres) it can be useful to connect the cable shielding to the negative pin of the transducer power supply).
