Building strength

through innovation,
design and customer
focused values

Legrand is the global specialist in electrical and digital building infrastructures. Innovation is the driving force behind its development. With an increasing investment in research and development (circa 5% of sales) and more than 4,000 active patents, the Legrand Group is focused on maintaining a high rate of new product launches that present innovative solutions to the market.

CUSTOMER TRAINING AND SUPPORT

Legrand is committed to providing ongoing customer support and, with this in mind, has developed a wide variety of free CPD accredited seminars which are suited to anyone who is involved in the specification of electrical products and systems.

Visit [legrand.co.uk/training](https://www.legrand.co.uk/training) to find out more.

A RESPONSIBLE APPROACH TO THE ENVIRONMENT

The Legrand Group takes its environmental responsibility seriously. Designing and developing high environmental performance products means managing everything from the substances used through to 'eco-design' of products to ensure they have a minimum environmental impact throughout their lifecycle.

Product Environmental Profiles (PEP)

Legrand is committed to providing transparent, accurate information on the environmental impact of its products. Product Environmental Profiles (PEP), complying with standard ISO 14025, describe the environmental characteristics of products throughout their lifecycle.

PEPs are independently verified and certified by the PEP EcoPassport organisation.

www.pep-ecopassport.org

DX³ PROTECTION DEVICES AND ISOLATING SWITCHES

A new range of MCBs, RCDs, RCBOs and isolating switches with a uniform appearance and optimised dimensions.

see p. 54 to 65 and 82 to 84

CX³ POWER CONTACTORS

An updated design for Legrand's popular 2P, 3P and 4P power contactor range. N/O (normally open) and N/C (normally closed) versions available.

see p. 98 to 100

EMDX³ METERING DEVICES

A wide range of electricity meters and multi-function measuring units for door or DIN rail mounting, each supported by supervision software and a remote web-based monitoring system.

see p. 62 to 73

P17 TEMPRA PRO

LV 16 and 32 A industrial plugs and sockets with improved strength, safety and a wealth of design features with real user benefits.

see p. 176 to 187

The right enclosure for your environment

Legrand's range of industrial enclosures has been designed to the highest specification, providing the user with much more than just a box!

STEEL ENCLOSURES

Atlantic-E

Suitable for non-corrosive commercial and industrial environments.

FEATURES

- Full range of 27 sizes
- Complete with removable mounting plate
- Optional heavy duty mounting brackets
- Dual locks on larger sizes

TECH DATA

IP66 in accordance with IEC EN 60529
IK10 in accordance with IEC EN 62262

STAINLESS STEEL ENCLOSURES

Atlantic

Suitable for corrosive environments and those requiring rigorous hygiene (e.g. food industry).

FEATURES

- Available in 8 sizes
- 304L and 316L grade steel options
- Reversible enclosure with rounded door and protective flange
- Double bar locks

TECH DATA

IP66 in accordance with IEC EN 60529
IK10 in accordance with IEC EN 62262
Nema 4x

All the kit you need for your enclosure

Tailor your enclosure to the exact requirements of an installation with Legrand's wide selection of equipment, including plain and perforated plates, insulated modular chassis and internal doors, heating, ventilation and locking devices.

See p. 23 - 31

FREE CPD: SPECIFICATION GUIDE TO ENCLOSURES
VISIT: LEGRAND.CO.UK/TRAINING

GRP ENCLOSURES

Marina

Suitable for saline atmospheres or other corrosive environments.

FEATURES

- Available in 11 sizes
- Wall mounting and free standing options
- Reversible plain or glass window door - 180° opening
- Dual locks on larger sizes

TECH DATA

IP66 in accordance with IEC EN 60529
IK10 in accordance with IEC EN 62262

WEATHERPROOF ENCLOSURES

Plexo³

Suitable for a multitude of indoor and outdoor applications.

FEATURES

- Available in 11 sizes
- Fully reversible door and enclosure
- Lockable door handle
- Sealable cover and face plate
- Optimised cable runs and organisation

TECH DATA

IP65 in accordance with IEC EN 60529
IK09 in accordance with IEC EN 62262
Conform to EN 60439-3

WEATHERPROOF BOXES

Plexo 55 / Plexo 66

Suitable for a multitude of indoor and outdoor applications.

FEATURES

- Quarter turn fixings
- Halogen free option
- Plain and transparent cover options
- Rail or plain plate equipment mounting

TECH DATA

Atlantic-E... strength and innovation in equal measure

This robust range of steel wall mounting enclosures is the latest addition to Legrand's extensive industrial product portfolio. Atlantic-E has been designed to the highest specification and incorporates a number of innovations that make installation faster and easier than ever before.

Designed with the installer in mind

Save time on installation... each Atlantic-E enclosure is supplied ready to use with a removable plain mounting plate, cable entry plate, earth connection braid and wall mounting brackets.

Flexible and reliable... doors are easy to remove, are fully reversible if required, and offer a 130° opening for easy access inside the enclosure. Innovative design features provide greater strength and weatherproofing to ensure a long-lasting installation.

- Full range of 27 sizes (up to 1200 x 800 x 300 mm)
- Supplied complete with removable mounting plate
- IP 66 weatherproof seal
- IK 10 - maximum protection against mechanical impact
- Dual locks on larger sized enclosures provide additional security
- Optional mounting brackets for heavy loads

Optional features and fully compatible products extend your choices

With a wide selection of accessories and equipment available, Atlantic-E enclosures can easily be tailored to the specific requirements of each application.

Heavy duty mounting brackets
see p. 14

Mounting plate options
see p. 23

Transcab open slot panel trunking
see p. 48 to 51

Viking 3 terminal blocks
see p. 116 to 135

Sectioned uprights - provide greater door strength and mounting holes for cable trunking

Weatherproof seal - polyurethane seal for greater reliability and total weatherproofing to IP 66

Removable plain mounting plate - provides maximum usable space and an easy method of fixing equipment directly. Optional perforated plates or ready to use chassis available

Mounting brackets - wall mounting brackets supplied with enclosure. Optional mounting brackets for heavy loads available

Double bar locks - ensure a totally weatherproof seal. Supplied with double bar key. Alternative locks available

Reversible door - easy to remove. With metal hinges for guaranteed strength. Opens to 130° for easier access inside the enclosure

Removable cable entry plate - fully weatherproof polyurethane seals aligned with the base of the enclosure for a high quality finish. Can be equipped with cable glands

Atlantic stainless steel wall mounting enclosures

IP 66 - IK 10 - Nema 4x

Technical information and dimensions **opposite**
Equipment **p. 23-31**

IP 66 according to IEC 60529
IK 10 according to IEC 62262 (EN 50102)
UL listed (Nema 4x)
CSA, Bureau Veritas, LRS. LCIE N° 170 790 10A
Stainless steel 304 L, 316 L
Upper and lower protective hoods
Door with rounded vertical sides

For use in :

• areas requiring a high level of hygiene :

- food processing plants and dairies
- industrial/commercial kitchens

• corrosive conditions :

- chemical plants
- pharmaceutical, petroleum and paper industries

• very harsh environments :

- industrial; acid or acid fumes
- offshore; naval; chlorides present

Automatic positioning of equipment on to active corners with M8 fixings
Provision to fix optional runners and brackets for depth adjustment in enclosures from 600 x 400 x 250 mm (contact us on +44 (0) 845 605 4333)

Pack Cat. Nos. **Stainless steel enclosures¹ – 304 L (1 door)**

Double bar lock. Epoxy finish. Zamak coated
Locking points : 1 lock for heights \leq 400 mm
2 locks for heights \geq 500 mm

		External dimensions (mm)			Weight (kg)

Wall mounting brackets

Supplied with stainless steel screws
Horizontal or vertical installation
Set of 4
Upto max. load 300 kg

1	0364 06	304 L
1	0364 16	316 L

1 : Cat. Nos. 0352 00/01 are fitted with 1 lock, all others are fitted with 2 locks
2 : Supplied with plain plate

■ Technical information

Stainless steel enclosures provide a solution in harsh, aggressive environments such as chemical plants or offshore

Corrosion resistance

	304 L	316 L
To salt spray (SS)	1 000 hrs	2 000 hrs
To sulphur dioxide (SO ₂)	500 hrs	1 000 hrs

Brushed stainless steel finish

Polygrain 180
- Ra 0.25 to 0.35 μ m
- Rt 2.5 to 4 μ m

Stainless steel properties

304 L : Provides good resistance to :

- nitric acid at concentrations of 52 % or less at all temperatures (or 98 % when cold)
- cold dilute organic acids
- alkaline solutions (unless hot or above 50 %)
- saline solutions except chlorides, sulphides and sulphates
- fresh water and natural atmosphere low in chlorides
- food products (except mustard and white wine)

316 L : Provides good resistance to :

- phosphoric acids - all concentrations \leq 40 °C
- sulphuric acids < 10 % and > 80 % at 20 °C
- sulphuric compounds \leq 70 °C
- sulphuric vapours and solutions, even boiling
- salt solutions except chloride
- alkaline solutions - all concentrations < 100 °C
- fresh water and natural atmosphere (particularly marine conditions)
- organic, food and pharmaceutical compounds

Physical properties

Specific weight - density : 8
Coefficient of expansion : 16 μ / m °C
Specific heat : 500 J / kg °C
Electrical resistivity : 0.75 $\mu\Omega$ mm²
Thermal conductivity : 15 W / m °C

The only way of guaranteeing excellent resistance to intercrystalline corrosion is the low carbon content (0.03 %) of 304 L and 316 L stainless steel

Tough Plexo³ weatherproof enclosures

Your DIN rail equipment is in safe hands with Plexo³. House up to 72 modules over 4 rows in this fully reversible, fully reliable range of enclosures.

FULLY REVERSIBLE
ENCLOSURE
AND DOOR

STRONG AND WEATHERPROOF

IP 65: weatherproofing and UV treatment guaranteed for applications in damp places

IK 09: enhanced impact resistance (shock-resistant polystyrene)

Double closing point to ensure a good seal

FAST, SIMPLE INSTALLATION

Removable faceplate: easier maintenance on individual rows

Rails can be removed one by one

Removable chassis for wiring outside the enclosure

CLEVER, TIME SAVING ACCESSORIES

Knockout cable entries at the top and bottom of the enclosure

Cable glands can be fitted according to your requirements

Hinged doors open fully for easy access to cables

Plexo³ weatherproof enclosures and accessories

IP 65 - IK 09

Technical information and dimensions p. 34

IP 65 - IK 09 - Class II
 Self-extinguishing : resistance to incandescent wire 650 °C
 Conform to EN 60439-3
 Door and enclosure fully reversible
 Removable chassis and faceplates from 2 row versions up
 2 position rail for modular products and moulded cases
 Spacing between rails 150 mm
 Can be fitted with perforated plates and solid faceplates for mounting non-modular products
 Lockable door handle, sealable cover and faceplate
 Shock-resistant polystyrene material
 Box colour light grey L750A, cover colour dark grey R746A
 Supplied with earth and neutral terminal blocks (except Cat. No. 6019 32)

Pack	Cat. Nos.	Enclosures 2 to 8 modules per row

310 x 240 x 124	x	x	x	x	x	x
360 x 270 x 124	x	x	x	x	x	x

2 : Also accepts partly shrouded terminals

■ Thickness of walls

Up to 270 x 170 box = 2 mm
Above this size = 3 mm

Example of box fitted with 4 x IP 2X terminals

Plexo weatherproof boxes

increased depth PVC range

0921 22

0350 43

Dimensions opposite and p. 41

Grey RAL 7035

Operating temperature : - 20 °C to +50 °C

PVC box and cover

Self-extinguishing : 750 °C for Cat. Nos. 0350 43 and 0922 84

960 °C for Cat. Nos. 0350 58 and 0921 22

Deep weatherproof plastic industrial equipment boxes with smooth sides

Fixing options :

- inside : 4 oblong holes at back of box

- outside : cabling volume at 4 corners with Ø4 screws

- with wall mounting brackets (Cat. No. 0364 08) for 310 x 240 boxes

Option of mounting equipment on rail or on plain plate at back of box

1/4 turn opening/closing

Pack	Cat. Nos.	Weatherproof boxes – IP 55
		Nominal internal dimensions : Height x Width x Depth (mm)
		Depth 140 mm
2	0921 22	IK 07 - IP 55 220 x 170 x 140 mm - (1/4 turn cover fixings)

TRANSCAB® ...

uniquely innovative
open slot trunking

Innovative design and high quality materials combine to create a globally approved system that is quick and easy to install

TRANSCAB 'HOW TO' VIDEO... VISIT [YOUTUBE.COM/LEGRANDTVUK](https://www.youtube.com/legrandtvuk)

Using the specially designed tool, support bars can be easily and cleanly removed

Once the support rib is removed, the base can be snapped to length

By removing individual support ribs, large gaps for T-junctions can be made without the need for a saw

Cable retainers are available for horizontal and inverted installations. Label holders clip onto fingers for easy identification of cables

With its innovative snap to length design, Transcab open slot panel trunking is quick and easy to install without compromising on quality. And with its global standards approvals, Transcab is ideal for almost any industrial application.

Strength and flexibility

Transcab's durable PVC body consists of 6mm gaps and 6.5mm fingers with unique support ribs that provide strength and rigidity. Trunking fingers are easily removed by snapping at support rib or base level without the need for a saw.

FEATURES

- Snap to length design - for quick and simple installation without the need for a saw
- Rounded fingers - easily removed at support rib or base level to create T-junctions
- Clip-on covers with raised lines - for quick installation and easy label alignment
- Available in PVC and PC/ABS halogen-free versions - to suit a variety of applications
- Sizes : width x height - from 15 x 25mm to 150 x 100mm
: supplied in 2m lengths

ACCESSORIES

- Unique cutting tool for removing support ribs - Cat No. 0367 10
- Cable retainer - for vertical and inverted installations
- Label holder clips to fingers - for easy identification of cables

See p. 50

TECHNICAL DATA

APPROVALS: EN 50085 Parts 2 and 3, UL and CSA

SLOTING: Open with 6mm gaps

FLAMMABILITY: UL94 V0 rated

OPERATING TEMPERATURE: -5 to + 60°C

COLOUR: Grey RAL 7030 (PVC), light grey RAL 7035 (PC/ABS halogen-free)

Transcab® open slot panel trunking

PVC and PC/ABS halogen free

Dimensions and technical information p. 51
Accessories **opposite**

Conforms to EN 50085 Parts 2 and 3. UL and CSA approval
Material : PVC self-extinguishing or PC/ABS halogen free
Colour : grey RAL 7030 (PVC) or light grey RAL 7035 (PC/ABS)
PC/ABS range passes IEC 695-2-1 850 °C glow wire test
Operating temp. : -5 to +60 °C
UL classification : UL94 VO
Oxygen index : 43% (PVC) or 37% (PC/ABS) EN ISO 4589 (low fume)
Metric size body in 2 m lengths (6 mm gap/6.5 mm finger width)
DIN fixing centres of 12.5/25 mm
Maximum space for cables with good heat dissipation
Exit cables at terminal or base level

6361 20	100	60	16-1
6361 03	25	80	18-6
6361 08	40	80	18-6
6361 13	60	80	18-6
6361 17	80	80	18-6
6361 21	100	80	18-6
6361 25	120	80	18-6
6361 14	60	100	20-6
6361 22	100	100	20-6
6361 23	150	100	20-6

Calculating the panel trunking usable cross section

Graph for H 05 V-K and H 07 V-K cables with 0.75 packing coefficient

Example :

150 conductors 0.75 mm² → 1230 mm² cross section and
120 conductors 1.5 mm² → 1700 mm² cross section
Makes a total of 2930 mm²

The correct panel trunking is Cat. No. 6361 12, 60 x 60 mm, with a capacity of 3115 mm²

Faster base build without a saw

Remove reinforcement bars at required length and break

'T' junctions made easy

- 1 Clip out the required section width reinforcement bars and snap out section
- 2 Form T junction and fix into place
- 3 Ready for wiring – cut cover to suit

POWER PROTECTION

In developing its new range of DX³ protection devices, Legrand has paid particular attention to the performance of each individual product, with every item being individually tested before it leaves the factory.

You're in safe hands with Legrand's power protection range.

DX³ MCBs

TECH DATA
 Breaking capacity: 10kA, 16kA
 Pole range: single to four pole
 Current rating: 1A to 125A
 Tripping characteristics: Type B, C, D

DX³ RCDs

TECH DATA
 Pole range: double and four pole
 Current rating: 16A to 100A
 Types: A, AC
 Sensitivity: 10mA, 30mA, 100mA, 300mA and 500mA

THE FIGHT AGAINST COUNTERFEIT... MANY DX³ PRODUCTS ARE MARKED WITH A UNIQUE REGISTRATION NUMBER. VISIT: WWW.LEGRAND-COPYTRACER.COM

NEW DX³ range...

Legrand's new DX³ range of MCBs, RCDs, RCBOs and isolating switches (p. 82) offer a variety of enhanced features...

WIRE GUIDE FLAP ensures the wire is in the correct position

RISING CLAMP TERMINALS ensure a high quality, durable connection

INCREASED SAFETY guaranteed IP2X protection with no risk of contact with live parts, even with faceplate open

INNOVATIVE LABEL HOLDER offers improved opening mechanism and grip on label, plus enhanced dust protection

CLEAR, CONCISE MARKING Curve, rating and breaking capacity are easily identified

THE DOUBLE CLIP enables a device to be replaced without disconnecting the entire row. Now available on all devices

NEW

DX³ RCBOs

TECH DATA

Breaking capacity:	10kA
Pole range:	single pole, single pole + neutral to four pole
Current rating:	3A to 63A
Tripping characteristics:	Type B, C
Sensitivity:	10mA, 30mA, and 300mA

NEW

EMDX³ metering devices

A wide range of metering devices available:

- Electricity meters and multi-function measuring units
 - Door and DIN rail mounting options
 - MID certified meters
 - Supported by supervision software and remote web-based monitoring system
- see p. 68 to 73

Fuses and fuse carriers

In addition to DIN rail mounted protection devices, Legrand offers a comprehensive range of cylindrical fuses, blade fuses and modular fuse carriers.

see p. 74 to 79

... with added benefits for MCBs

80 to 125A DX³ MCBs benefit from all of the innovations offered by the new DX³ range and in addition offer a whole host more...

Temperature rise
-20%

RELIABLE CONNECTIONS

Compensation for the effect of loosening to ensure excellent hold over time and consistent contact

LOCK IN OPEN POSITION simply by using a single Colring cable tie (see p. 138)

EASY TAP-OFF CONNECTION IP2X automatic terminals safely connect an auxiliary circuit or measuring device

ALLEN SCREW and Allen key make it easier to tighten to required torque

RETRACTABLE INSULATING SHIELDS no additional accessories required to isolate connections on high rating devices no matter what the breaking capacity

10	4063 07	For heat reduction – 0.5 module	

technical information

■ Breaking capacity in IT neutral earthing system

MCB single pole breaking capacity at 400 V according to IEC 60947-2

	DX ³ 10000 16 kA
1P/2P/3P/4P	4 kA

■ Breaking capacity in the event of short-circuit to earth and insulation voltage

	1P/2P/3P/4P 230/400 V~ MCBs DX ³ 10000 16 kA
Icn1	16000 A
Ui	500 V

Icn1 : Breaking capacity on 1 pole for multipole MCBs in the event of short-circuit to earth
Ui : Rated insulation voltage

■ Terminal connection cross-sections (mm²)

Copper cable	Rigid	Flexible
DX ³ 6000 10 kA	35	25
DX ³ 10000 16 kA		
Auxiliaries	2.5	2.5

■ Technical characteristics of auxiliaries

Max. connection cross-section : 2.5 mm²
Operating temperature : -25°C to +70°C

■ Signalling auxiliaries

Umin. : 24 V~ / = and Imin. : 5 mA

■ MCB selectivity table

MCBs/MCBs (in A)

	80										600	750
	100											750
	125											

T : total selectivity, up to downstream circuit breaker breaking capacity according to IEC 60947-2

The magnetic threshold and the nominal rating of the downstream MCB must always be inferior to the ones of the upstream MCB

■ Back up between MCBs (in kA)

In 3 phase networks + N 400/415 V according to IEC 60947-2

MCBs upstream	DX ³ 10000 16 kA B, C and D curves	
MCBs downstream	10 to 125 A	
DX ³ 6000 - 10 kA B, C and D curves	≤ 20 A	16 kA
	25 A	16 kA
	32 A	16 kA
	40 A	16 kA
	50 A	16 kA
	63 A	-

In 3 phase networks + N 230/240 V according to IEC 60947-2

MCBs upstream	DX ³ 10000 16 kA B, C and D curves	
MCBs downstream	≤ 32 A 40 to 125 A	
DX ³ 6000 - 10 kA B, C and D curves	≤ 20 A	32 kA 25 kA
	25 to 40 A	- 25 kA
	50 A	- 25 kA
	63 A	- 25 kA

■ MCB tripping curves

Curves	Magnetic threshold settings
B	3 to 5 In
C	5 to 10 In
D	10 to 14 In (10 to 20 acc. to the stds)

protection of DC circuits

Protection of DC circuits

DX³ 6000 and DX³ 10000 MCBs (1P/2P/3P/4P - I_n ≤ 63 A) designed for use in 230/400 V~ supplies, can also be used in DC circuits. In this case, the following deratings and precautions must be taken into account

1 - Protection against short-circuits

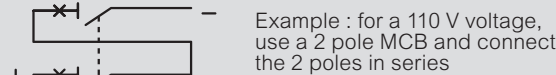

Max. magnetic tripping threshold : multiplied by 1-4
 Example : For a C curve MCB for which the AC tripping threshold is between 5 and 10 I_n, the DC tripping threshold will be between 7 and 14 I_n

2 - Protection against overloads

The time/current thermal tripping curve is the same as for AC

3 - Operating voltage

Max. operating voltage : 80 V per pole (60 V for single pole + N MCBs)
 For voltages higher than this value, several poles must be wired in series

4 - Breaking capacity

4000 A for a single pole MCB at max. voltage (80 V= per pole)

For other voltages, the breaking capacities are as follows:

DX ³ 6000	voltage	single pole	2P	3P
Acc. to IEC 60947-2	≤ 48 V	6 kA	6 kA	
	110 V		6 kA	6 kA
	230 V			
Ics ¹	≤ 48 V	100 %	100 %	
	110 V		100 %	100 %
	230 V			

DX ³ 10000	voltage	single pole	2P	3P	4P
Acc. to IEC 60947-2	≤ 48 V	10 kA	10 kA		
	110 V		10 kA	10 kA	
	230 V				15 kA
Ics ¹	≤ 48 V	100 %	100 %		
	110 V		100 %	100 %	
	230 V				100 %

1 : As a % of Icu

5 - Distribution of breaking poles

To choose the MCB and determine the pole distribution necessary for breaking on each of the polarities, it is necessary to know how the installation is earthed

• Supply with one polarity earthed:

Place all the poles necessary for breaking on the other polarity. If isolation is required, an additional pole must be added on the earthed polarity

1 : Only if isolation required

Example : circuit earthed via the negative polarity / U = 110 V= / I_{sc} = 10 kA / I_n = 32 A

Protect the positive polarity using an MCB capable of breaking 10 kA at 110 V (DX³ 10000 2P 32 A with 2 poles on the positive polarity)
 For isolation, use a DX³ 10000 3P 32 A with 2 poles on the positive polarity and one pole on the negative polarity

DX ³ 10000	voltage	single pole	2P	3P	4P
Acc. to IEC 60947-2	≤ 48 V	10 kA	10 kA		
	110 V		10 kA	10 kA	
	230 V				15 kA

• Network earthed via a middle point:

Place on each polarity the number of poles necessary for max. I_{sc} breaking at half voltage

Example : circuit earthed via a middle point / U = 230 V= / I_{sc} = 6 kA / I_n = 10 A

Protect each polarity using an MCB capable of breaking 6 kA at half voltage, i.e. 115 V (DX³ 6000 4P 10 A with 2 poles on each polarity)

DX ³ 6000	voltage	single pole	2P	3P
Acc. to IEC 60947-2	≤ 48 V	6 kA	6 kA	
	110 V		6 kA	6 kA
	230 V			

• Isolated earth supply:

Distribute the poles necessary for breaking over the 2 polarities to provide protection in the event of a double earth fault (particularly if there are a number of circuits in parallel)

Example : isolated earth circuit / U = 48 V= / I_{sc} = 4.5 kA / I_n = 40 A
 Protect the installation with an MCB capable of breaking 4.5 kA at 48 V and protect each polarity (DX³ 6000 MCB 2P 40 A with one pole on each polarity)

DX ³ 6000	voltage	single pole	2P	3P
Acc. to IEC 60947-2	≤ 48 V	6 kA	6 kA	
	110 V		6 kA	6 kA
	230 V

DX³-ID - RCDs (residual current devices)
Connection cross-section

RCDs	Cable (mm ²)	
	rigid	flexible
Connection at top and bottom	50	35

AC type - Standard applications

AC type RCDs detect AC residual currents
 In the majority of cases (standard applications), they are used for AC current detection at 50/60 Hz

A type - Specific applications: dedicated lines

In addition to the characteristics of AC type RCDs, A type RCDs also detect DC residual currents
 They are used whenever fault currents are not sinusoidal
 They are particularly suitable for the following specific applications (hobs, washing machines...) or materials that may produce DC fault currents, speed drives with frequency inverters, etc.

PUTTING MEASUREMENT AT THE HEART OF ENERGY EFFICIENCY

From MID¹ certified electricity meters and door mounted multi-functional displays, to remote web-based supervision software, Legrand's new EMDX³ metering range puts measurement at the heart of energy efficiency.

EMDX³ UNIT - FOR DIN RAIL

EMDX³ UNIT - FOR DOOR MOUNTING

DIN rail mounted EMDX³ measurement control units

Meter, measure, monitor and communicate all of the essential parameters of the installation on this DIN rail mounted module:

- Dual tariff metering
- Active and reactive energy
- Operating time
- Power factor
- Harmonic distortion
- Programmable alarms

Door mounted EMDX³ measurement control units

Meter, measure, monitor and communicate all of the essential parameters of the installation via a large display:

- Dual tariff metering
- Active and reactive energy
- Operating time
- Power factor
- Harmonic distortion
- Programmable alarms

For increased functionality, e.g. temperature/memory, additional modules are available. See p. 69

Any project that aims to **optimise** quality and **energy efficiency** must include **measurement**

DISPLAY OF 32 MEASUREMENT POINTS ON PC, TABLET AND SMARTPHONE

Remote supervision and viewing

With Legrand's communication interfaces (RS 485, IP), supervision software and Web servers, measurements can be centralised and displayed remotely on any device which is equipped with a web browser:

- Desktop / laptop
- Tablet
- Smartphone

DIN RAIL MOUNTED ELECTRICITY METER

DIN rail mounted EMDX³ electricity meter

EMDX³ meters installed in modular enclosures can be used to monitor consumption:

- By building
- By floor

MID certification (selected meters)

EMDX³ electrical energy meters

┌ rail mounting

0046 70

0046 74

Technical information p. 71-73

Measure the electricity consumed by a single phase or three phase circuit downstream of the electricity distribution metering. Display electricity consumption in kWh, as well as other values such as current, active energy, reactive energy and power (depending on the catalogue number).

Conform to standards IEC 62053-21/23, IEC 62052-11 and IEC 61010-1. MID compliance ensures accuracy of the metering with a view to recharging for the electricity used.

Single-phase meters

Pack	Cat. Nos.		
1	Non-MID 0046 70	MID certified	Direct connection 32 A - 1 module Pulse output
1	0046 81		36 A - 2 modules Pulse output
1	0046 72	0046 78	63 A - 2 modules Pulse output
1	0046 77	0046 79	63 A - 2 modules RS 485 output

Three-phase meters

Pack	Cat. Nos.		
1	Non-MID 0046 73	MID certified 0046 82	Direct connection 63 A - 4 modules Pulse output
1	0046 80	0046 83	63 A - 4 modules RS 485 output
1	0046 74	0046 85	Connection with CT 5 A - 4 modules pulse output
1	0046 84	0046 86	5 A - 4 modules RS 485 and pulse output

Concentrator

Pack	Cat. Nos.	
1	0046 87	For collecting and transmitting measurements taken by 7 universal pulse electricity meters. Also collects data from other meters (gas meters, water meters, etc.) RS485 output 4 modules

NEW

EMDX³ multi-function measuring units

┌ rail mounting

0046 76

Technical information p. 71-73

Conform to standards :
- IEC 61557-12
- IEC 62053-22 class 0.5 S
- IEC 62053-23 class 2

Pack	Cat. Nos.	EMDX ³ modular
		For mounting on ┌ rail Width : 4 modules • LCD display • Measurement of currents, voltages, active, reactive and apparent power and internal temperature • Dual tariff metering : - Active energy consumed - Reactive energy consumed - Operating time - Power factor • THD voltages and currents up to order 51 • Programmable alarms on all functions • Outputs for controlling wiring devices, alarm feedback and pulse feedback
1	0046 75	EMDX³ pulse unit Data transmission via pulses
1	0046 76	EMDX³ RS 485 unit Data transmission via RS 485 communication interface and pulses

EMDX³ multi-function measuring units

NEW

for mounting on door or solid faceplate

0146 68

0146 69

0146 73

0261 78

0261 89

Technical information p. 71-73

Conform to standards :

- IEC 61557-12
- IEC 62053-22 class 0-5 S
- IEC 62053-23 class 2

Pack	Cat. Nos.	EMDX ³ - Access
1	0146 68	Multi-function measuring unit For mounting on door or solid faceplate Dimensions : 96 x 96 x 60 mm • LCD display • Measurement of currents, voltages, active, reactive and apparent power, internal temperature and power factor • Metering : - Active energy consumed or produced - Reactive energy consumed or produced - Operating time - Pulses • THD voltages and currents up to order 51 • Programmable alarms on all functions Can take 2 optional modules
1	0146 71	Modules for EMDX³ - Access multi-function measuring unit RS485 communication module MODBUS link
1	0146 72	1-output module Can be assigned to pulse feedback, alarm feedback or control of wiring devices

Pack	Cat. Nos.	EMDX ³ - Premium
1	0146 69	Multi-function measuring units For mounting on door or solid faceplate Dimensions : 96 x 96 x 60 mm • LCD display • Measurement of currents, voltages, active, reactive and apparent power, internal temperature and power factor • Metering : - Active energy consumed or produced - Reactive energy consumed or produced - Operating time - Pulses • Individual harmonics up to order 63 • Programmable alarms on all functions Can take 4 optional modules

Pack	Cat. Nos.	EMDX ³ - Premium (continued)
1	0146 73	Modules for EMDX³ - Premium multi-function measuring units RS 485 communication module MODBUS link
1	0146 74	Storage module Storage of active and reactive power over 62 days, the last 10 alarms and the average voltage and frequency values over 60 days max.
1	0146 75	Module with 2 inputs/2 outputs Up to 3 modules, i.e. 6 inputs/6 outputs, can be installed Outputs can be assigned to monitoring mode, remote control or timed remote control
1	0146 77	Temperature module Indication of the internal temperature and possibility of connecting 3 sensors for measuring the external temperature

Pack	Cat. Nos.	Communication and supervision
		Web servers Enable remote viewing, via a web browser on PCs, smartphones, web viewers, tablet computers such as iPads, Archos, etc., of values collected on electricity meters and multi-function measuring units
1	0261 78	For 32 metering points (meters or multi-function measuring units)
1	0261 79	For an unlimited number of metering points (meters or multi-function measuring units)
		Legrand software dedicated to measurement For displaying the values collected from electricity meters or multi-function measuring units on a PC connected to the network
1	0261 88	For 32 metering points (supplied on CD)
1	0261 89	For an unlimited number of metering points (supplied on CD)
		IP converter For RS485/Ethernet conversion for connecting electricity meters and multi-function measuring units to an IP network Supply voltage : 90-260 V~ 50/60Hz Dimensions : 3 modules
1	0046 89	

current transformers CT

0047 79

Pack	Cat. Nos.	Single phase current transformers (CT)								
		Used with ammeters, electricity meters or multi-function measuring units Provide a 0 to 5 A current at the secondary, proportional to the primary current For fixing on plates, EN 60715 rail Cat. Nos. 0046 31/34/36, or bars Secondary connected by terminals or lugs Precision class 1%								
		For 16 x 12.5 mm bar and Ø21 mm cable								
		<table border="1"> <thead> <tr> <th>Transformation ratio</th> <th>Output (VA)</th> </tr> </thead> <tbody> <tr> <td>50/5</td> <td>1.25</td> </tr> <tr> <td>100/5</td> <td>2.5</td> </tr> <tr> <td>200/5</td> <td>5.5</td> </tr> </tbody> </table>	Transformation ratio	Output (VA)	50/5	1.25	100/5	2.5	200/5	5.5

EMDX³ electrical energy meters

└ rail mounting

■ Technical information

Single phase meters Cat. Nos. 0046 70/72/77/78/79/81

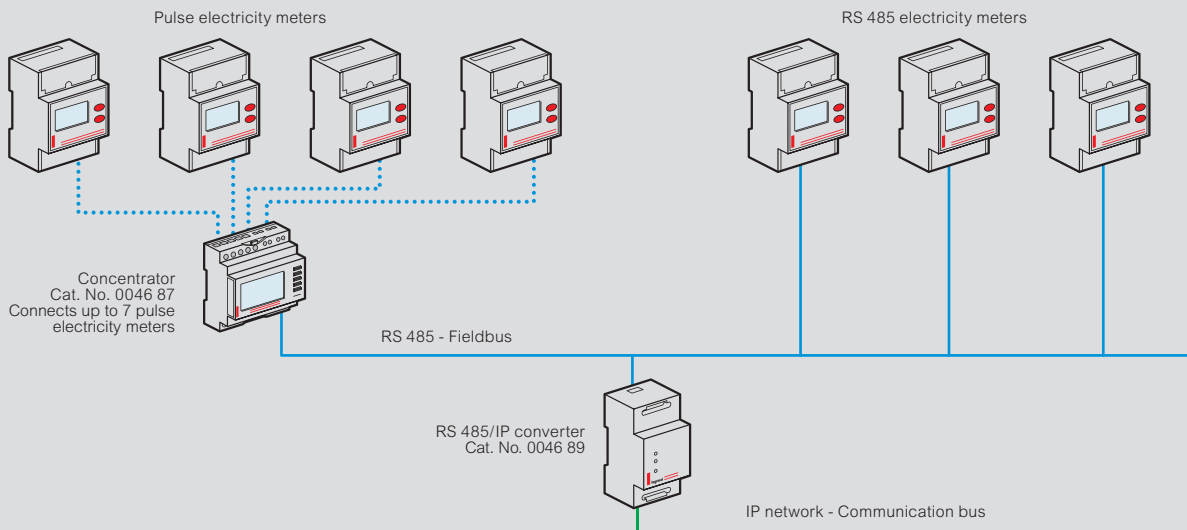

LCD display : 7 digits
 Resolution : 0.1 kWh
 Maximum indication : 99999.9 kWh
 Metrological LED : 1 Wh/pulse (Cat. No. 0046 70 : 0.5 Wh/pulse)
 Accuracy (EN 62053-21) : class 1
 Reference voltage Un : 230 V-240 V
 Reference frequency : 50-60 Hz

Three phase meters Cat. Nos. 0046 73/74/80/82/83/84/85/86

LCD display : 8 digits
 Resolution : 0.01 kWh¹
 Maximum indication : 99999.99 kWh¹
 Metrological LED : 0.1 Wh/pulse or 1 Wh/pulse
 Active energy accuracy (EN 62053-21) : class 1
 Reactive energy accuracy (EN 62053-23) : class 2
 Reference voltage Un :
 - Single phase : 230-240 V
 - Three phase : 230(400)-240(415) V
 Operating limit range (EN 62053-21, EN 62053-23) :
 - Single phase : 110 to 254 V
 - Three phase : 110(190) to 254(440) V

Choice of equipment

Type	Rated current	Maximum cartridge rating			
		400 V ~		500 V ~	
		gG	aM	gG	aM
SP 51	50 A	50	50	50	40
SP 58	100 A (125 A in 400 V)	125	125	100	100

Protection index : IP 2X - IP 2X C - under front plate

Equipment derating

Justified under more severe conditions of use :

- Ambient temperature over 35 °C : derate fuse by one rating per 10 °C (UTE C 20-051)
- Side-by-side equipment in simultaneous function

2 or 3 devices	0.9 x I _n
4 or 5 devices	0.8 x I _n
6, 7, 8 or 9 devices	0.7 x I _n
≥ 10 devices	0.6 x I _n

This coefficient is to be applied on the nominal rating of the base (IEC 60439-1)
Continuous operation : it may be necessary to upgrade the bases by one size

Modular protective terminal shield mounting (see p. 75)

ISOLATION, CONTROL AND SIGNALLING

Developments within Legrand's isolation, control and signalling range include new DX³ isolating switches which boast the same design improvements as DX³ MCBs, RCDs, RCBOs (see p. 54), and in addition new CX³ contactors which are available with or without handle.

NEW

DX³ ISOLATING SWITCHES

FEATURES

- Double break contacts
- Locking possible in open and closed position

TECH DATA

Category of use:	AC 22A / 23A
Current rating:	16A to 125A
Rated voltage:	250V / 400V

Vistop isolating switches also available. see p. 85

CHANGEOVER SWITCHES

FEATURES

- Locking accessories available
- Two way, double two way and two way with centre point options

TECH DATA

Category of use:	AC 22A
Nominal rating:	20A
Rated voltage:	250V / 400V

NEW

DX³... next generation DIN rail devices

Isolating switches, MCBs, RCDs, RCBOs, control and signalling auxiliaries... the guarantee of finding the function you need with a uniform appearance and optimised dimensions.

See page 54 to find out more about the new DX³ range

THE FIGHT AGAINST COUNTERFEIT... MANY DX³ PRODUCTS ARE MARKED WITH A UNIQUE REGISTRATION NUMBER. VISIT LEGRAND-COPYTRACER.COM

TRANSFORMERS AND POWER SUPPLIES

FEATURES

- Control, signalling and safety isolation transformers
- Compact transformers
- Filtered power supplies

For further information see p. 90 to 97

NEW

CX³ POWER CONTACTORS

FEATURES

- Contact choice: N/O - normally open
N/C - normally closed
- Easy fixing of control and auxiliaries ensures optimum strength
- Available with or without handle
- Independent screw connection / wiring of control and power terminals at any one time

TIME SWITCHES

FEATURES

- Digital and analogue versions available
- DIN rail and surface mounting options
- AlphaRex³ programmable range

For further information see p. 104 to 113

It's a push button, it's a control switch... you decide

Turn a momentary contact into a maintained contact at the turn of a button with Legrand's versatile push button / control switches.

Available with normally open (N/O), normally closed (N/C) or both N/O and N/C contacts, and in single function or dual function with indicators.

 Operating temperature : -5 °C to +40 °C

Dimensions

Cat. Nos.	B
0043 82/85	17.7
0043 83	35.6

Installation

- **Mounting**
 - on symmetrical rail EN 50-022
 - with Ø3 mm screw on plate using ends of released claws
 - supply via the top or the bottom
 - operating position : vertical

Wiring

Conductors permitted

Flexible with end caps	1.5 to 4 mm ²
Rigid	1.5 to 4 mm ²

Tools required :

Flat blade screwdriver	Ø4 mm
Posidrive screwdriver	Pz 1

Tightening torque

Min.	0.8 Nm
Max.	1.8 Nm
Recommended	1.2 Nm

TRANSFORMERS AND POWER SUPPLIES

the reliable choice

Specifically designed to meet the needs of control and signalling, isolation and safety isolation, Legrand's open type single phase transformers are suited to a multitude of applications.

The offer is complemented by a range of filtered power supplies, specifically for 12 or 24 V DC applications.

MEETING THE STANDARDS

CONTROL &
SIGNALLING
IEC / EN 61558-2-2

ISOLATING
IEC / EN 61558-2-4

SAFETY ISOLATING
IEC / EN 61558-2-6

CONTROL, SIGNALLING AND ISOLATION TRANSFORMERS

Ideal for heavy automation systems, industrial process systems and complex machinery.

FEATURES

- Primary tapping +/- 15 V
- 40 VA to 4000 VA
- Permanent laser engraved markings
- DIN rail mounting or mounting plate fixing
- Integral electrostatic shield
- Interference/disturbance filter
- Visible terminals ensure safe and reliable connections
- Supplied complete with voltage links

TECHNICAL DATA

APPROVALS: IEC/EN 61558-2-2, IEC/EN 61558-2-4, IEC/EN 61558-2-6, UL, CSA

PROTECTION: IP2X up to 400 A, IK04

OPERATING TEMPERATURE: up to 50° C without derating

RECOMMENDED PROTECTION: via a gG type fuse or by C type circuit breaker

COMPACT TRANSFORMERS

Ideal for standard systems where compact dimensions are a key installation requirement.

FEATURES

- Fixed secondary voltage: 24 V range
- 40 VA to 630 VA
- Noise filtering up to 220 VA
- Permanent laser engraved markings
- Multiple fixing options: standard plate mounting
DIN rail mounting optional
- Visible terminals ensure safe and reliable connections
- Supplied complete with voltage links

TECHNICAL DATA

APPROVALS: IEC/EN 61558-2-4, IEC/EN 61558-2-6

OPERATING TEMPERATURE: up to 35° C without derating

RECOMMENDED PROTECTION: Type T fuses for 40 VA and 63 VA
Type C MCBs for 100 VA and greater

FILTERED POWER SUPPLIES

A range of filtered power supplies for PLCs and other equipment requiring a voltage of 12 V DC or 24 V DC.

FEATURES

- Ripple factor < 3%
- Twin output terminals for ease of connection
- DIN rail or mounting plate fixing
- Noise filtering
- Integrated secondary fuse protection
- Supplied with busbar for quick connection between neutral and earth (up to 15 V)

TECHNICAL DATA

APPROVALS: IEC/EN 61558-2-6, UL, CSA

OPERATING TEMPERATURE: Up to 60° C without derating

Note : 40-250 VA transformers have juxtaposed windings with an insulated barrier to provide insulation and interference filtering. Higher ratings have an electrostatic screen between windings

1 : Up to 250 VA may be fixed to symmetrical DIN rail

compact transformers

open type single phase

Technical information and dimensions **p. 93**
Transformer protection **p. 95**

Isolating and safety isolating <50 V transformers
Designed to meet the needs of users with specific VA ratings such as original equipment manufacturers
The terminals are designed to provide easy and quick connections
Transformers up to 160 VA can be clipped to rail using accessory or directly fixed using screws through the easily accessible fixing points
Multiple fixing possibilities :
- clip to DIN rail using Cat. No. 0044 16 or 0428 99 (≤ 160 VA)
- screw directly on to Lina 12.5 or Lina 25 mounting plate (≥ 220 VA)
Recommended protection :
• for 40 and 63 VA : Type T fuses (5x20) time delay fuse to IEC 60127
• for >100 VA use MCB Type C

how to calculate

the rated power of a transformer

In equipment containing control devices, the transformer power depends on the maximum power required at a given moment (inrush power), the permanent power, the voltage drop and power factor

When determining the permissible instantaneous power (inrush power) required, the following factors should always be taken into account :

- two inrush currents cannot occur at the same time
- power factor $\cos \varphi$ equals 0.5
- at maximum, 80% of devices are supplied at the same time (this percentage can be calculated precisely for each device)

Determination of the inrush power

Where a simplified calculation of the power is required, the following formula can be used :

$$P_{\text{inrush}} = 0.8 (\Sigma P_m + \Sigma P_v + P_a)$$

ΣP_m : sum of all contactor steady state power levels (holding power)

ΣP_v : sum of all power levels of indicators and LEDs¹

P_a : inrush power of the largest contactor

Example :

A machine tool control cabinet comprising :

- 10 contactors for 4 kW motors, with a steady state power of 8 VA
- 2 contactors for 18.5 kW motor, with a steady state power of 20 VA
- 1 contactor for 45 kW motor, with a steady state power of 20 VA, and an inrush power of 250 VA $\cos \varphi$ 0.5
- 20 remote control relays, with a steady state power of 4 VA
- 30 signalling LEDs, with a consumption of 1 VA each

$$-\Sigma P_m = 220 \text{ VA } \{ (10 \times 8 \text{ VA}) + (2 \times 20 \text{ VA}) + (1 \times 20 \text{ VA}) + (20 \times 4 \text{ VA}) \}$$

$$-\Sigma P_v = 30 \text{ VA } (30 \times 1 \text{ VA})$$

$$-P_a = 250 \text{ VA}$$

$$P_{\text{inrush}} = 0.8 (220 + 30 + 250) = 400 \text{ VA at } \cos \varphi \text{ 0.5}$$

Determination of the rated power of a transformer

For control transformers, in particular, simply start with an inrush power at $\cos \varphi$ 0.5 and read the size from the table below

Rated power in VA IEC and CSA	Admissible instantaneous power in VA IEC/EN 61558-2-2 with $\cos \varphi$ of :								
	0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1
40	90	80	72	66	61	57	53	51	53
63	160	140	130	120	110	100	90	90	90
100	240	190	170	160	150	140	130	130	140
160	480	400	350	300	270	240	220	200	190
250	830	690	590	510	450	400	360	330	310
400	1 600	1 400	1 200	1 000	900	800	800	700	700
630	2 000	1 800	1 500	1 400	1 200	1 100	1 100	1 000	1 000
1 000	5 400	4 600	4 000	3 600	3 200	3 000	2 700	2 600	2 500
1 600	9 000	8 000	7 200	6 600	6 100	5 700	5 400	5 300	5 600
2 500	17 300	16 600	16 000	15 700	15 200	14 900	14 700	14 600	15 100
4 000	34 500	28 800	24 400	17 000	16 600	16 400	14 800	13 400	12 400

From the example above, an inrush of 460 VA at $\cos \varphi$ 0.5 gives a transformer size of 250 VA

Checking the selection

As a precaution, make the following checks on each of your devices :

- first calculate the sum of the steady state power for the coils and the LEDs powered at the same time
- then apply a coefficient : use either our hypothetical figure of 80% of devices at steady state power, or the actual calculation for your equipment
- the power of the chosen transformer shall be greater than or equal to the result of the calculation

1 : LED = Light Emitting Diode

General information

Transformers take around 25 times the load at switch on

$VA \div V =$ current in the winding
either PRIMARY or SECONDARY

$$\text{i.e. } \frac{300 \text{ VA}}{12 \text{ V}} = 25 \text{ A} \times 25 = 625 \text{ A}$$

The power triangle :

Secondary power/voltage information

Example : compact transformer 100 VA - 12/24 V Cat. No. 0428 42

Identification of markings

Changing voltage

Isolation transformer (functional insulation between primary and secondary)

Auto transformer (no insulation between primary and secondary)

Control circuit power supply

Control transformer (functional insulation between primary and secondary)

Electric shock protection

- Protection against direct and indirect contact by :

Safety transformers (reinforced insulation between primary and secondary, no-load voltage < 50 V)

- Protection against indirect contact by :

Circuit separation transformers (reinforced insulation between primary and secondary)

The transformer function(s) can either be defined by the equipment designer or can be imposed by installation guidelines or the equipment standard

Definitions of electrical shock :

- Electric shocks : physiopathological effect resulting from an electrical current passing through the human body
- Direct contact : persons coming into contact with live parts (connected to the mains)
- Indirect contact : persons coming into contact with grounding which is accidentally live following an insulation fault

protection of transformers, primary and secondary circuits

Protection of transformers

In accordance with the IEC EN 61558 standard, transformers must be protected against overload and short-circuit conditions which may occur during normal operation.

The standard does not specify the type or location of the protective device : it is the manufacturer's responsibility to choose the most suitable position, either on the primary or secondary side. The rating, type and location of the protective device are to be indicated on the device identification plate.

Protection of the primary and secondary circuits

General

Circuits must be protected against overload and short-circuit conditions. Protection against overload is compulsory if the circuit is likely to be affected by an overload current. This protection can be installed at the supply source or end of the circuit.

Protection against a short-circuit is compulsory in all installations ; this protection has to be installed at the supply source of the circuit.

Supply circuits (transformer primary)

The transformer is a device which cannot itself generate overload. Its supply circuit therefore only requires protection against a short-circuit. When a transformer is energised, a very high inrush current (around 25 In)¹ is produced for approximately 10 ms.

When protecting the circuit, both factors must be considered.

Legrand offers three possibilities :

- type aM cartridge fuses,
- type D MCBs (with magnetic tripping set at 12 In average)
- type C MCBs (with magnetic tripping set at 7 In average)

Example : control transformer 630 VA - 230/24 V Cat. No. 0442 37

In primary 2·74 A (VA ÷ V)
I inrush at power-up 68·5 A (25 x 2·74 A)

Protection against a short-circuit can be provided by :

- type aM 6 A cartridge fuse
- type D 6 A MCBs
- type C 13 A MCBs - (16 A nearest UK)

Primary protection

Minimum protection rating for primary supply of the transformer :

Power (VA)	230 V single-phase			400 V single-phase			400 V three-phase		
	aM fuse	C MCB	D MCB	aM fuse	C MCB	D MCB	aM fuse	C MCB	D MCB

5 000	25	100	40	16	63	25	12	32	16

These values are given for information only for transformers with inrush currents of around 25 In.

1 : In = nominal rating of circuit

Protection of the secondary circuit

The secondary circuit must be protected against overload and short-circuit conditions. For overload, check that the protection rating chosen is lower than or equal to the transformer secondary current. For short-circuit, ensure that a short-circuit occurring at the furthest point of the circuit will trigger the protective device within 5 seconds.

Legrand offers two possibilities :

- type gG cartridge fuses
- type C MCBs (with magnetic tripping set at 7 In average)

If the transformer only supplies a single circuit, and provided the calculations show perfect compatibility, transformer protection (if on secondary) and circuit protection can be one and the same. A single protective device performs both functions (see table of transformer protective devices).

If the transformer supplies several circuits, overload and short-circuit calculations must be performed for each individual circuit. To check that the device chosen is suitable, an approximate minimum short-circuit value can be obtained using the following formula.

Formula for determining the secondary protection rating

Calculate the minimum short-circuit at the furthest point on the circuit :

$$I_{c/c \text{ min.}} = \frac{U_s}{\left(\frac{U^2 s}{P} \times \frac{U_{c/c \%}}{100}\right) + \frac{2\rho l}{S}}$$

Us = transformer secondary voltage

P = transformer power

U c/c % = transformer short-circuit voltage

l = line length in m

S = line cross section in mm²

ρ copper = 0·027 Ω mm²/m

Choose the protection rating so as to obtain a cut-off time of 5 seconds max. for a current I c/c defined above :

$$\text{type gG fuse : } I_n \leq \frac{I_{c/c \text{ min.}}}{4}$$

$$\text{type C MCB : } I_n \leq \frac{I_{c/c \text{ min.}}}{8}$$

Example : control transformer 630 VA - 230/24 V Cat. No. 0442 37

$$I_{c/c \text{ min.}} = \frac{24}{\left(\frac{24^2}{630} \times \frac{3\cdot3}{100}\right) + \frac{2 \times 0\cdot027 \times 15}{1\cdot5}} = 44\cdot42 \text{ A} = \text{Use either :}$$

$$\frac{44\cdot42}{4} = 11\cdot10 \rightarrow \text{gG fuse 10 A max.} \quad \frac{44\cdot42}{8} = 5\cdot55 \rightarrow \text{C type MCB 5 A max.}$$

Secondary protection

filtered power supplies

open type single phase

Dimensions and technical information **opposite and p. 97**

Filtered power supplies for PLCs and other equipment requiring a voltage of 12 V DC or 24 V DC

Include :

- twin output terminals for ease of connection
- safety transformer with interference filtration
- fuse protection on output
- green LED output voltage indicator
- capacitor in filtered range

Supplied with a connection link for quick connection between - and \perp up to 15 A

Fixing options :

- clip directly to DIN rail up to 24 W
- clip on or screw fixing up to 120 W
- screw fixing only above 120 W

■ Technical information

Conform to IEC / EN 61558-2-6, UL 60950
CAN/CSA C22.2 N° 60 950.00

Products are compatible with EN 61131-2, EN 60204 and EN 61439 apparatus

Input voltage : 230/400 V_{AC} \pm 15 V single phase 50/60 Hz - Class I

Output voltage : 12 V_{DC} or 24 V_{DC}

Insulation voltage : Input/Output 4 510 V

Input/Earth 2 260 V

Output/Earth 500 V

Max. ambient temperature without derating : 60 °C

Ripple factor : <3 %

Cooling by natural convection

Integral fuse protection on output

Can be fixed to symmetrical rail 7.5 mm or 15 mm depth EN 60715

Screw fix only Cat. Nos. 0470 04/24 and 25

Screw fix or clip on to DIN rail Cat. Nos. 0470 02/03/22 and 23

Supplied with a connection link for quick connection between terminals and earth

Note : To conform to UL, product must be mounted in the vertical position (mounting against support) for Class A ambient temperature rating 25 °C

■ Operating diagram

Operating current up to 15 A

DX³ MCBs p. 56-57
Fuses p. 76-77

filtered power supplies

1 : Handle can be accessed after removing blanking plate

Technical information

- Rated impulse withstand voltage (Uimp) : 4 kV
- Mechanical endurance (no. of operating cycles) : 10⁶ cycles
- Operating temperatures : - 25 °C to + 40 °C
- Storage temperatures : - 40 °C to + 70 °C

Contactor protection against short circuits according to standard EN 61095, conditional short circuit current:

- I_q = 6 kA for 16 to 25 A contactors
- I_q = 3 kA for 40 to 63 A contactors
- Circuit breaker or gG fuse rated:
 - ≤ 16 A for 16 A rating • ≤ 40 A for 40 A rating
 - ≤ 25 A for 25 A rating • ≤ 63 A for 63 A rating

Consumption of a contactor control coil

16 A and 25 A power contactors					
Coil voltage	24 V \sim		230 V \sim low noise	230 V \sim

Operating principle

Bell transformers

Safety isolating transformer with secondary voltage not permanently exceeding 24 V and for a non permanent usage

Power to 8 V-12 V or 24 V access control devices such as:

- bell
- chime
- door release
- optical electrical barrier

Also:

- flood detector
- temperature rise detector

Safety transformers

Designed to protect people from electric shocks by using extra low voltage (ELV $U_{sec} \leq 50 V$)

Power to 12 or 24 V devices such as:

- relay
- modular power contactor
- signalling unit
- latching relay

Connection busbars supplied with the transformer

1 : PTC refer to general characteristics

Fixings

Wall or DIN rail 7.5 or 15 mm² depth for 4 module units
 Rail DIN 7.5 or 15 mm² depth for 2 and 5 module units

2 : Remove with tool

Connection

	Primary flexible or rigid	Secondary flexible or rigid
	1 to 4 mm ²	1 to 4 mm ²
	1 to 4 mm ²	1 to 4 mm ²

TIME SWITCHES... MOVE WITH THE TIMES

Legrand's one and two channel time switches are available in digital and analogue versions, ranging from AlphaRex³ programmable switches with 0.1 second clock precision, to a more simplistic analogue technology with basic switching functions.

ALPHAREX³... THE NEXT GENERATION OF INNOVATION

AlphaRex³ is the latest addition to the digital time switches range. Available in astronomical light control and standard versions, each with PC programmable functionality.

- 0.1 second clock precision – unbeatable accuracy
- Zero crossing switching – reduces stress on the relay / increases longevity of time switch and lamp
- Expanded offset programming – ideal for outdoor signage and street lighting applications
- Expanded cycle functions – for non-lighting applications such as water features and water irrigation
- Preset time and date – no adjustment needed
- High torque terminal blocks – for enhanced safety
- Pin code for weekly devices – prevents unauthorised programming
- Programme back-up via data key – one key fits all devices

PROGRAMMING MADE EASY

AlphaRex³ can be programmed for standard applications using the push buttons on the device. More expert programming can be achieved either on site or remotely using a PC, data key and Legrand's patented programming software.

Technical information p. 107

Conform to EN 60730-1 and EN 60730-2-7
 Supply voltage : 230 V~ 50/60 Hz
 Mount on DIN rail EN 60715
 Text based programming. Programmable in 15 languages
 Programme directly on time switch keypad or remotely via a PC with Legrand AlphaSoft software, USB adaptor and data key
 Data key enables programmes to be transferred from one unit to another and for programmes to be stored
 EEPROM memory keeps programmes stored indefinitely
 Pin code facility to protect programmes from unauthorised changes
 Time switch accuracy : ±0.1 second per day
 Zero-crossing switching
 Automatic summer/winter time correction
 5 years running reserve
 Back lit graphic display
 Operating temperature : -20 °C to +55 °C
 Protection : IP 20
 Switching increment : 1 second
 Shortest switching time : 1 second

Pack	Cat. Nos.	AlphaRex ³	No. of 17.5 mm modules
1	4126 31	Weekly time switches 24h / 7 day programme time Particularly suited to irregular cycles (e.g. security installations and industrial installations) Random function to simulate presence - programmed switching cycles are shifted at random with a range of ±15 minutes Additional functions : Operating hours counter (for max. 65,535 hours) 1 hour test Cycle function Holiday programme AlphaRex D21 230 V 24 hr / 7 day single channel 1 x 16 A output 56 programmes	2
1	4126 41	AlphaRex D22 230 V 24 hr / 7 day two channel 2 x 16 A outputs 2 x 28 programmes	2

Pack	Cat. Nos.	Accessories
1	4128 72	Programming transfer key Enables programmes to be stored and / or transferred from one time switch to another when used with the programming software kit Cat. No. 4128 73 Data key can be stored directly within the time switch
1	4128 73	Programming software kit Create and read programmes remotely via a PC Transfer programmes via transfer key Cat. No. 4128 72 to time switches Kit comprises : AlphaSoft 4-0 software, data loader and transfer key Windows ^{®1} Vista compatible

light sensitive control and electronic time lag switches

digital for rail

4126 26

4126 02

Pack	Cat. Nos.	Programmable light sensitive switch
1	4126 26	<p>Can be used to switch a lighting circuit "ON" and "OFF" based on light conditions (nightfall, daybreak) Supplied with IP 65 weatherproof photoelectric cell Power supply : 230 V\sim - 50/60 Hz</p> <p>Standard</p> <p>56 programmes possible : daily, weekly or yearly programmes Output 16 A - 250 V\sim - μ cos φ = 1 2000 W incandescent 2000 VA series compensated fluorescent 1000 W energy-saving bulb Integrated hour counter High precision clock : \pm 0.1 sec per day at 25°C Working reserve : 5 years Adjustable from 3 to 100 000 lux Automatic changeover between summer/winter time Number of modules : 2 Programmed using programme transfer key Cat. No. 4128 72 (below) Supplied with IP 65 photoelectric cell Cat. No. 4128 58²</p>

Pack	Cat. Nos.	Accessories
1	4128 72	<p>Programming transfer key</p> <p>Enables programmes to be stored and / or transferred from one time switch to another when used with the programming software kit Cat. No. 4128 73 Data key can be stored directly within the time switch</p>
1	4128 73	<p>Programming software kit</p> <p>Create and read programmes remotely via a PC Transfer programmes via transfer key Cat. No. 4128 72 to time switches Kit comprises : AlphaSoft 4.0 software, data loader and transfer key Windows^{®1} Vista compatible</p>

Pack	Cat. Nos.	Electronic time-lag switch
10	4126 02	<p>For staircase lighting. Switches a lighting circuit on and off from remote switch for a specific time DIN rail mountable Self-protection in the event of a blocked push button</p> <p>Power supply : 230 V\sim - 50/60 Hz 2 000 W incandescent 2 000 W halogen - 230 V\sim 1 000 VA fluo-series compensated 120 VA fluo-parallel compensated 14 μF 100 VA compact fluorescent 1 000 W energy saving lamp Adjustable from 0.5 seconds to 10 minutes</p> <p>Output : 16 A - 250 V\sim - cos φ = 1 3 wire or 4 wire connection Manual override contact Number of modules : 1</p>

Technical information

Type Cat. No.	Light sensitive switch 4126 26	Electronic time-lag 4126 02
Supply voltage	230 V \sim	
Frequency	50/60 Hz	
Consumption	~1 W	0.8 W
Contact rating	Changeover contact 16 A 250 V \sim μ cos φ = 1	μ 16 A cos φ = 1/250 V \sim
Accuracy	\pm 0.1 second per day	\pm 2.5 seconds per day
Terminal capacity	Single strand 1.5 to 4 mm ²	Multi strand 1.5 to 2.5 mm ²
Program pictures	56	
Battery reserve	5 years	100 minutes
Operating temp.	-20 °C to +55 °C	-20 °C to +55 °C
Storage temp.	-20 °C to +60 °C	-20 °C to +70 °C
Setting range	1 lx ... 100 klx	
IP rating	IP 20	IP 30

Time-lag switch

Allows :

- unlimited numbers of unlit push-buttons
- 50 lit push-buttons max. (neon R = 1 mA max.)

Constant lighting possible

3-wire connection

4-wire connection

VIKING 3[®]

fast, secure
connections
every time

Available with a choice of screw, spring and heavy duty connection options, Viking 3 terminal blocks provide trusted, safe and reliable installations whatever your application.

Terminal blocks in the screw and spring connection ranges are complemented by a range of common accessories, including end stops, dividers and bridging combs.

Used in conjunction with Legrand's CAB 3 marking system and Starfix ferrules and crimping tools, Viking 3 provides a total solution for easy to use connection systems.

TECHNICAL DATA

APPROVALS:

Conform to EN 60947-7-1,
EN 60947-7-2, EN 60947-7-3,
UL / CSA / NF / VDE / IMQ
ATEX certification

SIZE RANGE:

To fit cable cross sections from
0.25mm² to 300mm²

FLAMMABILITY:

UL94, self extinguishing at 960°C

SCREW CONNECTION

Universal screw technology, ideal for distribution and process cabinets.

FEATURES

- Cable capacities from 0.25mm² to 95mm²
- High quality steel clamp ensures mechanical strength
- Angled cable entries for easy cabling and visible cable marking
- 2 central shunting zones
- Supplied pre-assembled in blocks of 5 or 10, using fixing pin
- 2 marking zones

SPRING CONNECTION

Ideal for vibration sensitive environments such as cranes, machines and onboard cabinets.

FEATURES

- Cable capacities from 0.5mm² to 16mm²
- Angled cable entries for easy cabling and visible cable marking
- Direct insertion of rigid cable, or flexible cable with ferrules, in terminal blocks up to 6mm²
- 2 central shunting zones
- Reduced cabling time
- Automatic connection with or without ferrules
- 2 marking zones
- No regular retightening required
- 5mm pitch block facilitates 4mm cable

HEAVY DUTY CONNECTION

Enables copper and aluminium cables with cross sections from 35mm² to 300mm² to be connected directly or via lugs.

FEATURES

- Multiple mounting options: DIN rail, G rail or plate fixing
- Compatible with CAB 3 marking system
- Sealable to create weatherproof connections
- Separation barriers and protective covers available
- Provide facility for the termination of larger cables associated with long cable runs

INTEGRATED ACCESSORIES

Common accessories across the screw and spring connection ranges include:

- End stops with screwless fixing
- Bridging comb with automatic insertion up to 8mm (screw) or 12mm (spring) widths
- Identification of blown fuses (12 / 48 V or 110 / 250 V)
- Additional functions can be added: standard, neutral or protected isolation, MCBs, automotive-type fuses, etc.

Perfect connections...

Create reliable connections in seconds with Starfix crimping tools and ferrules... everything you need for cable widths from 0.25mm² to 50mm².

See p. 148 to 149

clearly marked

CAB 3 offers a high quality solution to multiple cable and terminal block marking needs. Universal fittings enable clear, rapid marking and simple modification.

See p. 138 to 143

Viking 3 terminal blocks – screw connection

for copper cable

Accessories **p. 126-127**
 Technical characteristics **p. 128-129**

All V2 polyamide UL94 960 °C to IEC EN 60695-2-11
 Compatible with either rigid (0.25 mm² to 95 mm²) or flexible (0.25 mm² to 70 mm²) copper cables
 Facility for 2 bridging combs
 Compatible with rails depth 15 mm and rails EN 60715 depth 7.5 mm and 15 mm
 Range comprises only 2 block heights (2.5 mm² to 10 mm² and 16 mm² to 70 mm²) ensuring a neat installation

Viking 3 terminal blocks – spring connection

for copper cable

0372 60 + 0372 00 + 0372 20

0372 01

0372 21

0372 63

0372 40

Automatic insertion of stripped cable with ferrule cap or rigid cable up to width of 6 mm

0372 70 Automatic fixing on rail

0372 72

0372 79

Accessories **p. 126-127**
 Technical characteristics **p. 130-131**

Screwless connection system, stainless steel spring type
 Compatible with either 2 rigid copper cables or flexible cables (0.5 mm² - 16 mm²) with or without ferrules (p. 148)
 Direct tool-free insertion of a rigid cable. Direct tool-free insertion of a flexible cable with ferrule, up to 6 mm width
 Facility for 2 bridging combs
 Compatible with rails EN 60715 depth 7.5 mm and 15 mm

Technical characteristics p. 131

Pack	Cat. Nos.	Bridging accessories (continued)
		Bars for screw terminal blocks Front mounting with screws. Pre-assembled Consecutive or alternating connection
10	0375 40	For 12 blocks with 10 mm width
10	0375 42 ¹	For 12 blocks with 12 mm width
10	0375 44	For 12 blocks with 15 mm width
		Bridging combs for 3-level screw terminal blocks For lower and intermediate levels of blocks Cat. Nos. 0371 51/52 (p. 121). Side mounting Isolated and separable
10	0375 46	Brown. For 12 blocks with 5 mm width
10	0375 47	Blue. For 12 blocks with 5 mm width
		Bridging combs for spring terminal blocks Front mounting (automatic insertion), screwless Isolated. Red
20	0375 82	For 2 blocks with 10 mm width
20	0375 85	For 2 blocks with 12 mm width
		Accessories for disconnection blocks For screw and spring terminal blocks
		Blown fuse indicators Clip directly on to blocks Cat. Nos. 0371 81 (p. 120) or 0372 81 (p. 121)
50	0375 24	12/24/48 V _~ / \sim for block with fuse cartridge 5 x 20 with handle lever
50	0375 25	110/250 V _~ for block with fuse cartridge 5 x 20 with handle lever

Pack	Cat. Nos.	Shielding accessories
		Ensure safe, simple connection of cable shielding
		Shielding clamps For screw and spring terminal blocks - mounted by pivoting on collector bar 10 x 3 mm Cat. No. 0375 34 - mounted on plate with M4 screws (supplied) - mounted on rail with Cat. No. 0364 69 (p. 26)
10	0375 30	For cable diameter 3 to 8 mm
10	0375 31	For cable diameter 4 to 13.5 mm
4	0375 32	For cable diameter 10 to 20 mm
		Shielding bar For screw and spring terminal blocks. Steel. Length 1 m For use with end stop Cat. No. 0375 12 (p. 126) 10 x 3 mm
10	0375 34	
50	0375 35	Screening continuity bracket For screw terminal blocks 1 entry/1 exit 5, 6, 8 and 10 mm width Connected with 2.8 x 0.8 mm clips or welded on. Capacity : 1 mm ²
		Protective screens
		1 pole For screw terminal blocks 1 entry/1 exit
10	0375 65	5 and 6 mm width
10	0375 66	8 and 10 mm width
10	0375 67	12 and 15 mm width
		Cut to length Length 1 m Mounted on separation and insulation divider For screw terminal blocks 1 entry/1 exit
10	0375 68	5, 6, 8 and 10 mm width (divider Cat. No. 0375 60, p. 126)
10	0375 69	12 and 15 mm width (divider Cat. No. 0375 61, p. 126)
		Test meter adaptor
10	0375 27 ²	For screw and spring terminal blocks Measurement socket for Ø4 mm plug for blocks with 5 and 6 mm width

1 : Except for Cat. No. 0371 87 (p. 121)

2 : Except for disconnection blocks with handle lever, screw terminal block with LED and spring function blocks. 2 and 3-level terminal blocks : upper level only

Approved by ATEX :
LCIE 07 ATEX 0010 U-0081 II 1 or 2 G or D Ex e/i/tD/iD II

The terminal blocks with screw connection covered by this certificate are 1-, 2- and 3-level connection terminal blocks, and protection blocks with metal¹ and plastic base (detailed list on p. 118)

The main characteristics are :
Operating temperature : -30 °C to +55 °C
Maximum temperature of materials : +85 °C

Working voltage acc. to EN 60079-7 : 1-level terminal blocks : 500 V
Blocks with 2 entries - 2 exits : 250 V
2 and 3-level terminal blocks : 250 V

Approved by ATEX :

LCIE 07 ATEX 0010 U-0081 II 1 or 2 G or D Ex e/i/tD/iD II

The terminal blocks with spring connection covered by this certificate are 1- and 2-level connection terminal blocks, and blocks for protection conductor with metal base (detailed list on p. 120)

The main characteristics are :
Operating temperature : -30 °C to +55 °C
Maximum temperature of materials : +85 °C

Working voltage acc. to EN 60079-7 : 1-level terminal blocks : 500 V
Blocks with 2 entries - 2 exits : 500 V
2-level terminal blocks : 250 V

Completing the

Create reliable connections which are clearly marked and secured with Legrand's range of cabling accessories. From Starfix tools and ferrules to CAB 3 marking systems and Colson and Colring cable ties, we've got everything you need to complete your installation to the highest standard.

Starfix crimping tools - available in 3 sizes for cables from 0.25 to 6mm²

Fit the applicator

Adjust cable size

Insert cable and crimp

Starfix multi-purpose crimping tool - for cables from 0.5mm to 2.5mm²

Adjust cross section

Cut, strip and twist

Crimp

Create reliable connections in seconds with Starfix crimping tools and ferrules... everything you need for 0.25 to 50mm² cables.

perfect installation

Colring® cable ties

Colring polyamide 6/6 cable ties feature internal teeth and are available in black UV protected and colourless non UV protected options.

Tool available for tightening and trimming of Colring cable ties

Self-adhesive and screw mounting bases available

Colson® cable ties

Colson polyamide 12 (halogen-free, low fire hazard) cable ties feature external teeth and offer UV, high level acid and chemical protection.

Tool available for tightening and trimming of Colson cable ties

Screw mounting and wall plug bases available

Making your mark

CAB 3 offers a high quality solution to multiple cable and terminal marking requirements. Universal fittings enable clear, rapid marking and simple modification.

- Sizes range from 0.15 to 6mm²
- Numbers, letters, conventional symbols and international marker colours available
- Supplied in strips - easier to handle / less wastage
- For Viking 3, heavy duty terminal blocks - or fit directly to cables (retrofit possible)
- Mixed marker sets available

Markers can be fitted directly onto cables or via a marker holder

C (mm)	7	7	10

Marker holders – for Viking 3 terminal blocks

Cat. No. 0383 92

On-site toolbox

Cat. No. 0382 00

Bottom tray consists of :

- 8 medium slots (each slot takes 1 box of CAB 3)
- 1 large slot

Top tray consists of :

- 12 small slots (<=> approx. 6 boxes of CAB 3)
- 1 medium slot for applicators
- Capacity : approx. 15000 CAB 3 markers

■ Examples

CAB 3 fitted on to Viking 3 terminal blocks using marker holder (Cat. No. 0383 92)

Fitted directly on to heavy duty terminal blocks

Fitted on to cable with marker holder (Cat. No. 0384 92)

Cable tie specification guide

OPERATING TEMPERATURE

Always check the operating temperature, especially if the cable tie is to be installed in an application where extreme temperature may occur. Not all ties are made with the same material characteristics and some can become brittle at low temperatures and soften at high temperatures

Legrand recommends

- Colring polyamide 6/6 black cable ties (operating temperature: -15°C to +120°C)
- Colson polyamide 12 black cable ties (operating temperature: -40°C to +100°C)

ENVIRONMENT

Establish if the cable tie is being used inside or outside. Exposure to sunlight and UV rays can damage and break down the material causing the tie to weaken and fracture. Always choose a UV protected cable tie for external applications

Legrand recommends

- Colring polyamide 6/6 black or Colson polyamide 12 black UV protected cable ties for external usage

TENSILE STRENGTH

Consider the load that the cable tie will need to deal with. Tensile strength is the maximum stress that a material can withstand while being stretched or pulled before failing or breaking

Legrand recommends

- Colson polyamide 12 black UV protected cable ties for heavy load applications

For more information please contact Legrand on:

Tel: 0845 605 4333

Fax: 0845 605 4334

Email: uk-wdsales@legrand.co.uk

HALOGENS

Are halogen free cable ties required?

Halogens are a group of highly reactive elements. Products containing halogens can produce highly dangerous gases when burned, and can therefore be life threatening in the event of a fire

Legrand recommends

- Colring and Colson cable ties, both of which are halogen free

INTERNAL OR EXTERNAL TEETH

Cable ties with external teeth are particularly useful in applications where internal teeth could cause damage. An example of this is for suspended lines, where damage to insulation needs to be avoided

Legrand recommends

- Colson polyamide 12 black UV protected cable ties with external teeth

EXTERNAL AGENTS

Ensure that the cable ties are resistant to any external agents they may be exposed to, such as oils, greases, petroleum products and chlorinated solvents. This is particularly important for extreme environments

Legrand recommends

- Colring cable ties for environments where oils, greases, petroleum products and chlorinated solvents may be present
- Colson cable ties for environments where oils, greases, petroleum products, saline mist and diluted acids may be present

FIRE PROPAGATION

Is there a fire risk? This will affect the type of cable tie required. We would always recommend fire resistant cable ties to guarantee the safety of persons and property in the event of a fire

Legrand recommends

- All Legrand cable ties are flame retardant with a fire resistance to UL 94

- Flame retardant
- Conform to UL 94 requirements, HB classification
- Glow-wire flammability resistance according to IEC 60695-2-11 : 650 °C
- Oxygen index (LOI) according to EN ISO 4589-1/ASTM D 2863-00 : 20 %
- Low fire hazard polyamide

UV protected according to norm IEC 62275 type 1

UV protected black cable ties for outdoor use

These black cable ties have successfully undergone UV resistance and climatic ageing tests representing actual conditions of use

These cycles combine a 1000 hours radiance under arc or xenon lamp according to ISO 4892-2 method 1

Resistance to external agents

- Good resistance to oils, greases, petroleum products, saline mist and diluted acids

Resistance to rain

- Humidity absorption: ≤ 0.7%

Resistance to low temperatures

- Assembly -30 °C
- Fitted -40 °C

Resistance to sun

- Maximum temperatures :
- 85 °C continuous
 - 100 °C @ 1000 hrs
 - UV resistant

Colson approvals

Oxygen index : EN ISO 4589-1 and ASTM D 2863-00, 20 %

Corrosiveness of fumes : NFC 20-453, < 5 %

Flame retardancy : UL 94 HB

Type	Colson black
UV protection	yes
Polyamide material	12
Teeth	external
Halogen free ¹	yes
Humidity absorption ²	<0.7 %
Operating temperature	
- 20,000 hrs	85 °C
- 1,000 hrs	100 °C
Resistance to low temperatures	
- fitted	-40 °C
- assembly	-30 °C
Flame retardancy	UL 94 HB
Oxygen index (LOI) (EN ISO 4589-1/ASTM D 2863-00)	20 %
Self-extinguishing ³	650 °C

1 : Conform to Class I ASTM D 4066

2 : Conform to ISO 62 (EH 0-23 °C

3 : Conform to IEC 60695-2-11

■ Colson traceability

Each Colson cable tie can be identified, underlining Legrand's commitment to the consumer, so that you can always be sure you are using a genuine Colson

HYPRA - tough, durable reliability

Industrial plugs, sockets and combination units

A choice of plugs, sockets and combination units, each designed to meet the individual needs of specific areas of the market.

From the everyday simplicity of the P17 Tempra Pro and P17 Tempra ranges to the rugged sophistication and additional security presented by Hypra, which is further enhanced by its unique interlocked load break Prisinter sockets range.

HYPRA PRISINTER SOCKETS

- Unique interlocked load break
- Padlockable cover
- Compact combined socket and switch
- Surface and panel mounting options
- Available in plastic and metal versions

TECH INFO

- IP44/55
- IK09 (plastic)
- IK10 (metal)

NEW P17 Tempra Pro...

Following the success of P17 Tempra, Legrand's new P17 Tempra Pro range of LV 16 and 32A plugs and sockets offers improved strength, safety and a wealth of design features with real user benefits.

Available in IP44 and IP66/67 polyamide 6 versions, P17 Tempra Pro is suited to most internal and external applications.

See p. 176 to 187

Hypra[®] Prisinter...

take a load off
your mind

With its unique interlocked load break, the Prisinter is a key asset to the Hypra range and is available in 16, 32 and 63 A ratings.

Features:

- Combined socket and switch - saving space, cost and installation time
- Unique interlocked load break system - prohibits on load connection or disconnection for maximum safety
- Padlockable cover - for additional security
- Brass contact sleeves - create high quality, reliable connections
- Stainless steel screws - maximum durability

Simple, safe and unique

The added safety provided by Hypra's load break system prior to disconnection is equivalent to that provided by safety shutters on domestic sockets.

1. Turn the plug to lock in position and connect power
2. Press the isolator button to disconnect power and remove the plug

IK10 for metal products

Safe and adaptable power supply for TATA steel Colorcoat® PV Facility

Prisinter sockets and Hypra plugs were specified retrospectively for TATA in a facility which requires machinery to be moved on a regular basis. Machines, originally wired directly to Zucchini tap-offs, are now wired into Hypra plugs, and simply connected and disconnected as required under the safety of Prisinter's interlocked load break switch.

Above:
Hypra Prisinter socket, Hypra angled plug and Zucchini tap-off

IP 66/67-55 angled and straight plugs **p. 169-170**

Hypra® Prisinter IP 44/55 - LV 16/32/63 A

panel mounting interlocked switched sockets

■ Technical information

Icc 10 kA according to BS EN 60309-1, BS EN 60309-2, IEC 60309-1 and IEC 60309-2

IP rating according to BS EN 60529 and IEC 60529 :

IP 44 when plug inserted

IP 54 when used with IP 66/67-55 straight plugs

IP 55 with cover closed or used with IP 66/67-55 angled plugs

IK according to BS EN 62262 and IEC 62262 :

IK 09 : Plastic

IK 10 : Metal

Stainless steel screws

Brass contacts

Resistance to glow wire and dielectric strength

Glow wire :

960° C for live part supports

650° C for other parts

Dielectric strength : 3 000 V 50 Hz

Temperatures

-20 °C to + 100 °C (+80 °C with auxiliary fitted)

Installation : -20 °C / +40 °C

Use : -20 °C / +100 °C

Hypra Prisinter breaking capacity at 3 x 400 V_~ according to BS EN 60947-1, BS EN 60947-3, IEC 60947-1 and IEC 60947-3 :

Category	16 A	32 A	63 A

■ Accessories

Auxiliary contacts (-20 °C to +80 °C)

Prisinter sockets can accommodate two c/o auxiliary contacts (late make/early break) Cat. No. 0521 96 p. 156

These may be used to signal to a central control/monitoring station or control a contactor to remove load

Padlockable cover in closed position

Hypra® Prisinter IP 44/55

surface mounting back boxes

■ Dimensions

LV 16 A (p. 156)

3 x M20 entries with 2 x M20 blanking plugs

Equipped with :

2 earth terminals inside and 1 external (metal box)

2 earth terminals inside (plastic box)

	Material	Weight (kg)	A (mm)	B (mm)	C (mm)
2 P + ⊕	Plastic	0.14	115	97	78

HYPRA[®]

plugs and sockets

The Hypra range is aimed at installations where maximum durability is a must... including the nuclear, chemical and process industries.

The highest levels of protection and reliability

Available in IP44 and IP66/67-55 rated versions and manufactured in Polyamide 6, Hypra plugs and sockets are ideal for use in harsh and demanding environments.

The plastic units are IK09 rated, while the class leading metal units are IK10 rated – the highest rating for impact.

FEATURES:

- **Integrated cable gland on entire IP66/67-55 range** - providing the highest levels of ingress protection
- **Captive, slotted connection screws** - for fast secure connections
- **Nickel-plated brass pins and contact sleeves** - creating high quality, reliable connections
- **Captive, stainless steel external screws** - maximise durability
- **Double jaw cable clamps** - provide powerful cable fastening
- **Available in 2 ranges** - IP44 and IP66/67-55

HYPRA PLUGS AND SOCKETS - options for every application

PANEL AND SURFACE MOUNTING SOCKETS

CURRENT RATING - 16A, 32A, 63A, 125A

VOLTAGES - 20-25V, 20-50V, 110V, 240V, 400V

PIN CONFIG - 2P, 3P, 2P+E, 3P+E, 3P+N+E

IP RATING - IP44, IP66/67-55

MOBILE SOCKETS, STRAIGHT AND ANGLED PLUGS

CURRENT RATING - 16A, 32A, 63A, 125A

VOLTAGES - 20-25V, 20-50V, 110V, 240V, 400V

TECHNICAL DATA

APPROVALS:

BS EN 60309-1, BS EN 60309-2, BS EN 60529 (IP), BS EN 62262 (IK)

Products are interchangeable with other manufacturers' products that meet BS EN 60309-2

PROTECTION:

IP44 and IP66/67-55 ranges available

IK09 for plastic products

IK10 for metal products

SELF EXTINGUISHING:

850°C for insulated parts, 650°C for housing

OPERATING TEMPERATURE:

-50°C to +100°C

UNDERSTANDING THE IP66/IP67-55 RATING

IP 55 assured automatically with cover closed without locking ring secured

IP 55 guaranteed with IP 66/67-55 plug inserted and cover in place over spigot on plug

IP 66/67-55 obtained with locking ring secured

Hypra® IP 44 - ELV 16 A and LV 16/32/63 A

metal and plastic plugs and sockets

Technical information

IP 44 conforms to BS EN 60529 and IEC 60529
 Icc 10 kA according to BS EN 60309-1 and IEC 60309-1
 Stainless steel external screws - Nickel plated brass contacts
 IK according to BS EN 62262 and IEC 62262 : plastic = IK 09
 metal = IK 10

Wiring tested according to BS EN 60309-1

Type	Current	Conductors size (mm ²)	Conductors type
Surface and panel mounting sockets	ELV 16 A	4 to 10	Rigid
	LV 16 A	1.5 to 4	Rigid
	LV 32 A	2.5 to 10	Rigid
	LV 63 A	6 to 25	Rigid
Straight plugs and mobile sockets	ELV 16 A	4 to 10	Flexible
	LV 16 A	1 to 2.5	Flexible
	LV 32 A	2.5 to 6	Flexible
	LV 63 A	6 to 16	Flexible
Panel appliance inlets	ELV 16 A	4 to 10	Rigid
	LV 16 A	1 to 2.5	Rigid
	LV 32 A	2.5 to 6	Rigid
LV 63 A	6 to 16	Rigid	

Tightening torque of connection screws

ELV 16 A : from 1 to 1.2 Nm
 LV 16 A : from 0.7 to 1 Nm
 LV 32 A : from 0.7 to 1 Nm
 LV 63 A : from 2 to 2.2 Nm for Phase and Earth
 from 0.7 to 1 Nm for pilot

Note : Through entry boxes provide extra wiring space but not looping terminals

Hypra® IP 44 - LV 63 A

pilot pin connection

■ Example of 63 A 3 P + ⊕ and 3 P + N + ⊕ pilot pin connection

The pilot pin enables the load to be removed prior to the separation of the phase pins, when the circuit is routed via a contactor

The pilot pin connection accepts 2.5-6 mm² flexible or up to 10 mm² rigid conductor. It is the small centre pin in the connection

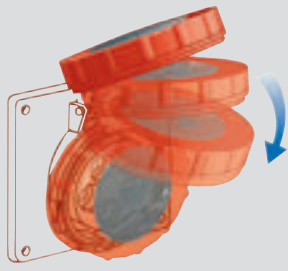

■ Pilot cabling

	63 A	Conductors type
Plugs and mobile sockets	2.5 to 6	Flexible
Surface and panel mounting sockets	2.5 to 10	Rigid

Hypra® IP 66/67-55 - LV 16/32/63/125 A

plastic plugs and sockets

■ Technical information

IP 66/67-55 conforms to BS EN 60529 and IEC 60529
 Icc 10 kA according to BS EN 60309-1 and IEC 60309-1
 Stainless steel external screws - Nickel plated brass contacts
 IK according to BS EN 62262 and IEC 62262 : plastic = IK 09

■ Wiring tested according to BS EN 60309-1

Type	Current	Conductors size (mm ²)	Conductors type
Plugs and mobile sockets	LV 16 A	1 to 2.5	Flexible
	LV 32 A	2.5 to 6	Flexible
	LV 63 A	6 to 16	Flexible
	LV 125 A	16 to 50	Flexible
Panel and surface mounting sockets	LV 16 A	1.5 to 4	Rigid
	LV 32 A	2.5 to 10	Rigid
	LV 63 A	6 to 25	Rigid
	LV 125 A	25 to 70	Rigid

Tightening torque of connection screws

LV 16 A : from 0.7 to 1 Nm
 LV 32 A : from 0.7 to 1 Nm
 LV 63 A : from 2 to 2.2 Nm for Phase and Earth
 from 0.7 to 1 Nm for pilot
 LV 125 A : from 3 to 4 Nm for Phase and Earth
 from 0.7 to 1 Nm for pilot

Note : Through entry boxes provide extra wiring space but not looping terminals

■ Example of 63/125 A 3 P + ⊕ and 3 P + N + ⊕ pilot pin connection

The pilot pin enables the load to be removed prior to the separation of the phase pins, when the circuit is routed via a contactor

The pilot pin connection accepts 2.5-6 mm² flexible or up to 10 mm² rigid conductor. It is the small centre pin in the connection

■ Pilot cabling

	63 A	Conductors type
Plugs and mobile sockets	2.5 to 6	Flexible
Surface and panel mounting sockets	2.5 to 10	Rigid

P17 TEMPRA PRO

RELIABLY VERSATILE....

Following the success of P17 Tempra, Legrand's new P17 Tempra Pro range of LV 16 and 32A plugs and sockets offers improved strength, safety and a wealth of design features that add simplicity and speed to the installation process. Every aspect of the new P17 Tempra Pro range has been designed with the user in mind.

SAFE AND SOUND

Manufactured from polyamide 6 which boasts high chemical resistance and IK09 impact rating, P17 Tempra Pro is no amateur. And with its impressive temperature resistance qualities and choice of IP44 and IP66/67 protection options, the range is suited to most internal and external applications.

PANEL MOUNTING SOCKETS

CURRENT RATING - 16A, 32A, 63A, 125A

TECHNICAL DATA

APPROVALS:

BS EN 60309-1, BS EN 60309-2,
 BS EN 60529 (IP), BS EN 62262 (IK)

PROTECTION:

IP44 and IP66/67-55 ranges available
 IK09

SELF EXTINGUISHING:

850°C for insulated parts, 650°C for housing

OPERATING TEMPERATURE:

-25°C to +40°C

P17 TEMPRA PRO

The new P17 Tempra Pro range has been subject to extensive research to ensure its new ergonomic design not only looks the part but makes life easier for the user. Reliable cable connections are easily created in an optimised wiring space which is protected by a robust exterior that performs well in a wide variety of environments.

Surface mounting sockets

EASY FIXING

Stainless steel captive screws with mixed head (for cross or flat screwdriver) form a strong seal and provide corrosion resistance

CABLE ENTRY

Back boxes have 4 threaded, sealed cable entries on the top and bottom edge and marking on the back for ISO cable glands or conduit

ONE SCREW

A single captive PZ 2 screw, per terminal for simple and easy connections

EASY REMOVAL

Remove active parts from the base for easier wiring and to change the angle of the socket

TWO MOUNTING POSITIONS

To solve the problem of limited space, surface mounting sockets offer 2 different mounting positions (5° or 25°) which allow users to adapt to the space available without changing the box

Mobile sockets and straight plugs

QUICK OPENING / CLOSING SYSTEM

Unlock by pressing with a screwdriver. Marking indicates the location for the locking clip. Open by turning the two parts in opposite directions

CABLE STRIPPING

Marking allows the user to see quickly the length of cable to be stripped. Option of using cables with ferrules

Innovative design and quality construction make P17 Tempra Pro ideal for a wide variety of applications

¹ : Panel mounting sockets (straight outlet) and appliance inlets are P17 Tempra items which are manufactured from plastic

P 17 Tempra Pro IP 44 - LV 16 and 32 A

sockets and mobile sockets

Technical information

Terminal connection :

- Panel and surface mounting sockets

16 A : max. 1 x 4 mm² rigid

32 A : max. 1 x 10 mm² rigid

- Plugs and mobile sockets:

16 A : max. 1 x 2.5 mm² flexible

32 A : max. 1 x 6 mm² flexible

- Appliance inlets :

16 A : max. 1 x 2.5 mm² rigid

32 A : max. 1 x 6 mm² rigid

IP 44 according to BS EN 60529 and IEC 60529

IK 09 according to BS EN 62262 and IEC 62262

Material : polyamide 6

Self-extinguishing : 850 °C (support of active parts) / 650 °C (plastic housing)

Temp. rating : -25 °C to +40 °C according to IEC 60309-1

Conform to BS EN 60309-1, IEC 60309-1, BS EN 60309-2 and IEC 60309-2

16 A 2 P+⊥ 230 V plug to 13 A 3 pin BS socket

P 17 Tempra IP 66/67 - LV 63 A

pilot pin connection, specifications and type

■ Example of 63 A 3 P + \perp and 3 P + N + \perp pilot pin connection

The pilot pin enables the load to be removed prior to the separation of the phase pins, when the circuit is routed via a contactor

The pilot pin connection accepts 2.5-6 mm² flexible or up to 10 mm² rigid conductor. It is the small centre pin in the connection

■ Pilot cabling

	63 A	Conductors type
Plugs and mobile sockets	2.5 to 6	Flexible
Surface mounting sockets	2.5 to 10	Rigid

Hypra[®] and P17[®]

safe, secure connections

Hypra[®]

Tough and durable combination units available with Hypra Prisinter or panel mounting sockets.

- Lockable transparent window - for security and instant monitoring of protection device status
- Captive, stainless steel external screws - for added durability
- Off load connection and disconnection on Prisinter equipped versions - providing additional safety for users and circuits alike
- Choice of circuit protection - DIN rail mounted MCB, RCBO and RCD protection options

Lockable transparent window for security and instant monitoring of protection device status

Prisinter sockets offer a unique interlocked load break

TECHNICAL DATA

APPROVALS:

BS EN 60309-1, BS EN 60309-2, BS EN 60529 (IP), BS EN 62262 (IK)

PROTECTION:

IP44, IP66/67-55 and IP66/67 ranges available
IK09

SELF EXTINGUISHING:

850°C for insulated parts
650°C for housing

OPERATING TEMPERATURE:

Mechanical lock only -20°C to +100°C
with RCD -15°C to +40°C
with MCB -5°C to +40°C

Single socket units with switch

Single socket units with switch and MCB / RCD protection

Prisinter single socket units with RCBO protection

combination units...

P17 Tempra®

These combination units feature a unique plug-in design that enables the base to be wired independently of the cover, making installation both quicker and easier:

1. Fix the base on to the wall
2. Wire the protection device and the base socket connection independently of the cover
3. Close the combination unit and plug in

Double mechanical interlocking switch cannot be turned on unless a plug is inserted. Once switched on, the plug cannot then be removed until the switch is turned off

Units can be fitted with a variety of Legrand modular devices, including MCBs, RCDs, timers, contactors and indicators. Lid window allows instant monitoring of protection device status

TECHNICAL DATA

APPROVALS:

BS EN 60309-1, BS EN 60309-2, BS EN 60529 (IP), BS EN 62262 (IK)

PROTECTION:

IP44, IP55 and IP66 ranges available
IK08

SELF EXTINGUISHING:

850°C for insulated parts
650°C for housing

OPERATING TEMPERATURE:

-20°C to +100°C without protection device
-15°C to +40°C with protection device

Interlocked switched sockets without protection

Interlocked switched sockets with DIN rail

Hypra® IP 66/67-55 combination units - LV 16/32/63/125 A

plastic surface mounting

Technical information

IP 67 conforms to BS EN 60529 and IEC 60529
 IK 09 conforms to BS EN 62262 and IEC 62262
 External screws in stainless steel
 Icc 10 kA conforms to BS EN 60309-1, BS EN 60309-2 and IEC 60309-1, IEC 60309-2
 Self-extinguishing : 850 °C for insulated parts (650 °C for housing) according to BS EN 60695-1, BS EN 60695-2, IEC 60695-1 and IEC 60695-2

Connection and protection

Connecting socket bases

Cross section of cables inside the unit according to the current used :
 Socket 16 A : 2.5 mm²
 Socket 32 A : 6 mm²
 Socket 63 A : 16 mm²

Types of protection and number of modules

Upstream, Hypra equipped or to-be-equipped units can integrate, according to catalogue numbers, modular protective devices of various kinds :
 Legrand MCBs, RCBOs and RCDs

NB : according to the required use, it is essential to check that the protection against indirect contacts (residual current) and the protection against overloads and short circuits (Legrand circuit breakers) are both well covered

Caution : a residual current device (RCD) does not provide protection against overloads and short circuits

Short circuit withstand : for the short circuit withstand of MCBs, RCBOs and RCDs, refer to the performance pages for these products in the relevant section of this catalogue

Ratings for units equipped with residual current device (RCD) :

Ratings		Sensitivity
16 A	RCD 25 A	30 mA
32 A	RCD 40 A	30 mA
63 A	RCD 63 A	30 mA

■ Interlocked switched sockets without protection/ with DIN rail - IP 66 LV 63 A (p. 194)

Cat. Nos. 0589 10/0572 99

industrial plugs and sockets to International Standards

Conform to BS EN 60309-1, BS EN 60309-2, IEC 60309-1 and IEC 60309-2

Voltage identification

Colours specified by standards and the clock indexing of the contact tubes in socket outlets

With Legrand Hypra and P 17 Tempra industrial plugs and sockets, your installations will comply fully with international standards :

- Standard IEC 60309-1 : this defines the safety regulations (protection of workers) which should be observed in the manufacture of industrial power sockets and plugs
- Standard IEC 60309-2 : this defines the interchangeability regulations for the dimensions of equipment with pins and sockets

These safety regulations, together with the requirements of standard BS EN 60309-1, define the safety conditions necessary for normal operation. It is prudent to go one step further and insist on equipment which ensures the safety of the persons as a priority as well as ease of operation. Many manufacturers therefore use sockets which incorporate a switch, to avoid on-load disconnection (eg : Hypra Prisinter).

ELV by position of the minor keyway

24 V \sim 50 – 60 Hz Violet

42 V \sim 50 – 60 Hz White

42 V \equiv White

LV by the position of the earth contact tube in relation to the major keyway in the socket outlets

110 V \sim 50 – 60 Hz Yellow

230 V \sim 50 – 60 Hz Blue

400 V \sim 50 – 60 Hz Red

500 V \sim 50 – 60 Hz Black

> 50 to 500 V \sim
100 to 300 Hz inclusive Green

Terminal connection capacity, Prisinter rating and contact sizes

Protection classifications

Protection against solid bodies and liquids : Index of protection - IP xx

Degree of protection of enclosures of electrical equipment in accordance with standards IEC 60529, BS EN 60529
Up to 1 000 V~ and 1 500 V=

1st digit: protection against solid bodies		Additional letter IP XX (ABCD): protection against direct contact resulting from the access to hazardous current-carrying parts		2nd digit: protection against liquids			
IP	tests	IP	tests	protection	IP	tests	protection
0	No protection				0		No protection
1	Protected against solid bodies larger than 50 mm	A	The back of the hand remains remote from dangerous parts		1	Protected against vertically-falling drops of water (condensation)	
2	Protected against solid bodies larger than 12.5 mm	B	The dangerous parts can not be touched when introducing a finger		2	Protected against drops of water falling at up to 15° from the vertical	
3	Protected against solid bodies larger than 2.5 mm	C	The dangerous parts can not be touched when introducing a tool (eg a screwdriver)		3	Protected against drops of rain water at up to 60° from the vertical	
4	Protected against solid bodies larger than 1 mm				4	Protected against projections of water from all directions	
5	Protected against dust (no harmful deposit)				5	Protected against jets of water from all directions	
6	Completely protected against dust	D	The dangerous parts can not be touched when introducing a wire		6	Protected against jets of water of similar force to heavy seas	
					7	Protected against the effects of immersion	
					8	Protected against prolonged effects of immersion under pressure	

Protection against mechanical impact : Index of protection - IK

According to standards IEC 62262 and BS EN 62262

IK	Tests	Impact energy (in Joules)
IK 00		0
IK 01		0.15
IK 02		0.2
IK 03		0.35
IK 04		0.5
IK 05		0.7
IK 06		1
IK 07		2
IK 08		5
IK 09		10
IK 10		20

(1) A product previously classed as IP xx-7 can be assumed to fulfill the conditions of an IP xx - IK 08

This table can be used to ascertain the resistance of a product to an impact given in Joules from the IK code (graduated from 00 to 10). It can also be used to ascertain the correspondence with the old IP code 3rd digit and the corresponding external "Ag" conditions.

The contents of the Protection Classifications charts are for guidance only. If you have any doubt as to the interpretation of the information contained therein, please refer either to the standard itself or contact Legrand.

Health and Safety at Work, etc. Act. 1974

Statement to Purchasers and Prospective Purchasers

1. Section 6 of this Act provides that manufacturers, designers, importers or suppliers of articles for use at work have a duty to ensure so far as is reasonably practical, that the article will be safe and without risk to health when properly used. An article is not regarded as being 'properly used' if it is used without regard to any relevant information or advice relating to its use made available by the manufacturer, designer, importer or supplier.

2. With regard to these provisions the following is given as a guide to the information which is readily available to you. This information relates to those products detailed in our catalogue(s) or associated literature or may be obtained by specific request to the Company.

3. All products should be installed and maintained in accordance with good engineering practice and relevant British or

other applicable standards, regulations for the installation of equipment by the Institute of Electrical Engineers or any other applicable Codes of Practice.

Health and Safety at Work Act

The Electricity at Work Regulations, 1989

1. All installations and maintenance should be carried out within the provision of the above Act and by persons so qualified as defined in the Act.

2. Information and advice on the suitability of our products can be obtained from Legrand Electric Limited on specific request.
