

Incremental Encoder Conversion Kit

Benefits:

- Immediate availability of a spare part for virtually every machine. £1000's saved in machine down-time in the event of an encoder failure
- Elimination of dedicated spares – reduced storage space and inventory costs

Application Areas (End Users)

- Food & Beverage plants
- Metal and Steel plants
- Woodworking plants
- Stage & Theatre
- Logistics & Warehousing
- & more...

Main Features & Kit Contents:

- A kit of parts for the urgent replacement of a large number of the incremental encoders installed in factories in UK and Ireland. Stored in a convenient carry case.
- Servo flange 6mm shaft, Face mount 10mm shaft and 5/8" hollow shaft programmable encoders 1-10000ppr, TTL/HTL with M23 connector exit.
- Collets for adaption of 5/8" hollow shaft to 6, 8, 10, 12, 14 or 15mm drive shafts.
- Alternative mounting bracket for hollow shaft encoder for adaption to existing fixings.
- 3m connector / cable assembly for replacement of cabled encoders
- Handheld programming tool + AA batteries.
