

Surge Protection Devices

Most people have heard of the term ‘surge protector’ but what are they, how do they work, and are they necessary in the UK?

What is a surge protector?

Surge protectors are designed to limit the voltage supplied to an electric device. Surge protection devices (SPDs) are designed to prevent electric shock and prevent excess voltage from damaging an installation's wiring infrastructure. It does this by either blocking or shorting to ground any excessive voltages above a safe threshold.

What are surges?

Electricity moves along a wire in a similar way to water running through a pipe. As the electricity flows it creates areas of low and high pressure - in electrical terms this is known as high and low electrical potential energy. The difference in this potential energy is measured by voltage and if it rises above the normal voltage for 3 nanoseconds or more, it is known as a surge.

During a surge the voltage increases and will surge through the system heating up the wiring which can cause fires or damage to equipment. It can even destroy equipment or wipe data from it.

The surge protector is designed to pick up any excess voltage and divert the excess electricity into a grounding wire. For this reason, a surge protector must be properly grounded to work correctly.

What causes electrical surges?

There are several things that can cause an electrical surge. Many people will immediately think of lightning as a cause. Lightning certainly is a common cause of electrical surges but in fact most power surges come from within your home or building.

The main causes of surges (Transients) include turning on or off electrical devices, faulty or damaged wiring, downed power lines or a fault at the power source.

Do you need protection?

It all comes down to choice, but a surge protector is advisable. All electric wiring deteriorates over the years and equipment/appliances such as fridge freezers motors etc are known to cause surges as well. Then, there's always the possibility of a lightning strike. An SPD is a relatively inexpensive device that puts itself in harms way to protect the equipment that really matters.

Meet the IMO SPD Range

THE ONLY THREE PRODUCTS YOU WILL EVER NEED!

SPDS-201N Compact Single Module SPD

- ⚡ 20kA Fault Level
- ⚡ Protects ALL earthing systems - TN, TT, IT
- ⚡ Type 2/3 Rated Protection

SPD2-401N Two Pole SPD

- ⚡ 40kA Fault Level
- ⚡ Protects ALL earthing systems - TN, TT, IT
- ⚡ Type 2/3 Rated Protection

SPD4-403N Four Pole SPD

- ⚡ 40kA Fault Level
- ⚡ Protects ALL earthing systems - TN, TT, IT
- ⚡ Type 2/3 Rated Protection

UNIVERSAL PROTECTION - AVAILABLE FROM STOCK

What the SPD range from IMO offers:

- ⚡ Compact / 2P / 4P devices to cover all applications
- ⚡ Competitively priced & available from stock
- ⚡ Protects all earthing systems - TN, TT, IT - Type 2/3
- ⚡ Suitable for 20kA & 40kA systems
- ⚡ The only surge protection devices you'll need!

IMO SPDs: Protection Rating

The SPD range from IMO are for Type 2 and Type 3 surge protection and as such can be used for either requirement as follows:-

Type
2

Type 2 Protection Rating

The Type 2 SPD is the main protection system for all low voltage electrical installations. Installed in each electrical switchboard, it prevents the spread of overvoltages in the electrical installations and protects the loads.

Type
3

Type 3 Protection Rating

The Type 3 SPD has a low discharge capacity. They must therefore mandatorily be installed as a supplement to Type 2 SPD and in the vicinity of sensitive loads.

IMO SPDs: Compatible Network Systems

TT

TT System (earthed neutral)

One point at the supply source is connected directly to earth.

TT System - 230/400V

TN

TN System (exposed conductive parts connected to the neutral)

The source is earthed as for the TT system (above). In the installation, all exposed and extraneous conductive parts are connected to the neutral conductor. Several TN System versions exist.

TNC System - 230/400V

TNC-S System - 230/400V

TNS System - 230/400V

IT

IT System (isolated neutral)

No intentional connection is made between the neutral point of the supply source and earth.

IT System - 230/400/600V

SPD Series

Our standard range of Surge Protection Devices, available in 2P or 4P configurations, with both designed to cover all applications, protecting all earthing systems.

- 2P / 4P devices to cover all applications
- Competitively priced & available from stock
- Protects all earthing systems - TN, TT, IT - Type 2/3
- Suitable for 20kA & 40kA systems
- The only surge protection devices you'll need

All IMO SPDs offer pluggable modules that enable you to easily swap out for parts replacement. The modules of the 2 and 4 pole version are the same units, this ability to interchange modules across the range makes ordering simple. Each module features coding pins and guides to avoid incorrect insertion of the module.

Universal Protection - Available from Stock

IMO SPDs are available in a number of different configurations, however, the following two products are available immediately from stock for universal protection:

SPD2-401N
Two Pole
40kA Fault Level

SPD4-403N
Four Pole
40kA Fault Level

Technical Data

	Universal Protection - Available From Stock	
Part Number	SPD2-401N	SPD4-403N
Type Of Network Systems	TN, TT, IT	TN, TT, IT
Maximum Continuous Voltage	275V	
Maximum Discharge Surge Current	40kA	40kA
Normal Discharge Current	20kA	20kA
Voltage Protection Level	1.2kV	1.2kV
Fuse Or Circuit Breaker	10A	10A
Response Time	<25ns	
Remote Signalling Of Disconnection	Option	
Protection Rating	IP20	
Connection	Screw Terminal: 4 to 25mm ² , By Busbar	
Temperature Range	-40°C +80°C	
Disconnection Indicator	Green window: Healthy / Red window: Replace	
Mounting	Symmetrical Rail (EN50022/DIN46277-3) 35mm	
Housing Material	PA6 UL94-V0	

Other Configurations					
SPD2-201N	SPD2-20-275	SPD2-40-275	SPD4-20-275	SPD4-40-275	SPD4-203N
TN, TT, IT	TN	TN	TN	TN	TN, TT, IT
275V					
20kA	20kA	40kA	20kA	40kA	20kA
10kA	10kA	20kA	10kA	20kA	10kA
1.0kV	1.0kV	1.2kV	1.0kV	1.2kV	1.0kV
10A	10A	10A	10A	10A	10A
<25ns					
Option

SPD4-BASE

SPDPM-XXX / SPDNP-XXX

SPDS Series

Our compact range of Surge Protection Devices, available in 1P configuration, designed to cover all applications, protecting all earthing systems.

- Compact 1P+N devices to cover all applications
- Competitively priced & available from stock
- Protects all earthing systems - TN, TT, IT - Type 2/3
- Suitable for 20kA & 40kA systems
- The only surge protection devices you'll need

IMO SPDSs offer pluggable modules that enable you to easily swap out for parts replacement. As the modules are standardised, it means that you can interchange them across the range without the need to re-wiring. Each module features a cleverly designed protective structure to avoid incorrect insertion of the module.

Universal Protection - Available from Stock

IMO SPDSs are available in two different configurations, however, the following product is available immediately from stock for universal protection:

SPDS-201N
Compact Single Module
20kA Fault Level

Technical Data

	Universal Protection - Available From Stock
Part Number	SPDS-201N
Max. continuous operating voltage	275V AC (L-N), 255V AC (N-PE)
Max. discharge current	20kA
Nominal discharge current	10kA
Voltage protection	1.2kV
Combination method	1+1
Short circuit current	500 A
Status indicator	Green window: Healthy / Red window: Replace
Wiring capacity	2.5mm (L-N), 4mm (N-PE)
Degree of protection (IP code)	IP20
Power supply network	TN, TT, IT
Mounting	Symmetrical Rail (EN50022/DIN46277-3) 35mm
Ambient temperature	-40°C +80°C
Ambient humidity	5%-95%
Altitude	< 2000m
Standard conformity	IEC61643-11:2011, EN61643-11:2012

	Other Configuration
	SPDS-401N
	275V AC (L-N), 255V AC (N-PE)
	40kA
	20kA
	1.5kV
	1+1
	500 A
	Green window: Healthy / Red window: Replace
	2.5mm (L-N), 4mm (N-PE)
	IP20
	TN, TT, IT
	Symmetrical Rail (EN50022/DIN46277-3) 35mm
	-40°C +80°C
	5%-95%
	< 2000m
