

CP62-38

Term Tech Rubber Self Amalgamating Tape 38mm x 10m Black

The Termination Technology range of self amalgamating tape produces strong waterproof joints which insulates and provides excellent weathering and corrosion protection. Also ideal for temporary cable sheath repairs. Suitable for use in moist or under water environments with minimal loss of voltage and volume resistance. Available in 10m rolls in a range of widths, supplied with a separator backing that must be removed before applying the tape.

Technical Data

Colour and Material

Material	Rubber
Colour	Black

Dimensions

Product Length (m)	10
Product Thickness (mm)	0.8
Product Width (mm)	38

Electrical Ratings

Disruptive Strength (Kv/mm)	18
-----------------------------	----

Physical Attributes

Tensile Strength (Mpa)	1.5
Maximum Elongation (%)	700
