

# TIS 1005

## TIS 1005

LOOP IMPEDANCE, RCD 30mA  
SOCKET POLARITY CHECKER

THE TIS 1005 IS A POCKET SIZE CHECKER FOR INDICATING LOOP IMPEDANCE, SOCKET POLARITY AND RCD 30mA ARE ALL OK. INDICATION IS BY LED'S AND BUZZER. IT IS AN IDEAL UNIT FOR INITIAL 'CHECKING OUT' OF A 13A SOCKET AND WILL ADVISE IF THE CIRCUIT IS OK, NEEDS ATTENTION OR NEEDS URGENT ATTENTION, AN IDEAL PRODUCT FOR HOUSING ASSOCIATIONS, LANDLORDS, COUNCIL PROPERTY DEPARTMENTS, SHOPPING CENTERS, ELECTRICIANS, ETC.

### SPECIFICATIONS

| Basic Functions   | Range                        | Accuracy     |
|---|------------------------------|--------------|
| Nominal Voltage   | 230V AC<br>110V AC           | ±10%<br>±10% |
| Frequency Range   | 50Hz - 60Hz                  |              |
| Contact Voltage Range   | <50V AC (Relative to Ground) |              |
| Overload Protection   | AC / DC 300V                 |              |
| Special Functions   |                              |              |
| Earth Loop Check at mains frequency                                   |                              | ✓            |
| Checks condition of Earth Loop  |                              | ✓            |
| Loop Detection Ranges < 1.8Ω, 1.8Ω - 92Ω, >92Ω                        |                              | ✓            |
| 30mA RCD Test   |                              | ✓            |
| 3 Coloured LEDs (Green, Amber, Red) give indication of condition      |                              | ✓            |
| Socket Checked against 17 possible fault conditions                   |                              | ✓            |
| Microprocessor controlled, with built in self check                   |                              | ✓            |
| First Socket Tester to indicate actual fault - Live, Neutral or Earth |                              | ✓            |
| Simple and Easy to Use, plug in and switch the socket on              |                              | ✓            |
