

Industrial Ethernet Cables

XS5/XS6

Cables and Connectors for EtherCAT® and Other Industrial Ethernet Networks

CAT6a Ethernet patch cables

- For in-cabinet use
- LSZH with standard RJ45 plugs

CAT5e Ethernet patch cables

- For out-of-cabinet use
- PUR with standard RJ45 plugs
- PVC with rugged RJ45 plugs
- PVC with M12 SmartClick plugs
- In addition to cables with sockets and robot cables, shield strengthening cables joined.

Connection Examples

Ideal for in-cabinet
XS6W-6LSZH

Standard Connectors

Ideal for out-of-cabinet

XS6W-5PUR	XS5	XS6
Standard Connectors	Rugged Connectors	Rugged Assembly Connectors

XS5		
M12 Connectors (Waterproof)		

■ Features

Cables with Standard RJ45 Connectors

For details, refer to page 4.

- The lineup features LSZH cables* for in-panel wiring and PUR cables for wiring outside of panels.
- The Standard RJ45 Connectors reduce cable routing space. LSZH cables are AWG26 with an outer diameter of 6.3 mm. PUR Cables are AWG26 with an outer diameter of 6.0 mm.
- Cable colors include blue, yellow, or green.
- LSZH cables are available in 12 lengths from 0.2 to 20 m and PUR cables are available in 10 lengths from 0.5 to 20 m.
- Single-shielded cables with individual aluminum tape on each wire pair to reduce EMC interference in industrial environments.

Note. PUR cables are double-shielded cables with overall braiding and individual aluminum tape on each wire pair.

* Low-smoke zero-halogen cables.

Cables with Rugged RJ45 Connectors

For details, refer to page 7.

- Tough latches and RJ45 connectors with strong cable holding strength are used to enable connections outside of control panels.
- Quad AWG22 cable with PVC cover of 6.5 mm outer diameter.
- Double-shielded cables with overall braiding and individual foil shield to reduce EMC interference in industrial environments.

Assembly Connectors

You can easily assemble Ethernet cables onsite without crimping tools or other special tools.

Refer to page 14 for the assembly procedure.

● Cable Extension Length

Standard Connectors (RJ45 Connectors)

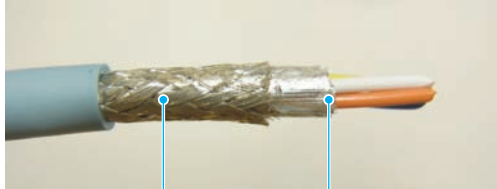

Rugged Connectors (RJ45 Connectors)

Cables with M12 Connectors (Waterproof)

For details, refer to page 7.

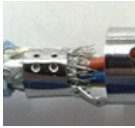

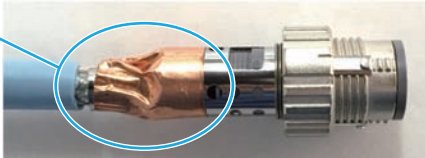

- Resistance to harsh environments with IP67 protection.
- SmartClick Connectors that provide one-step (1/8th turn) connection are used (compatible with standard M12 screw connectors).
- A wide range of variations, such as cables with right-angle connectors and PCB connectors.
- Cables with sockets and robot cables were added to the series.

Shape of M12 Connector	PVC Cable with Double Shield
 <p>Shield structure</p>	 <p>Overall braiding and individual foil shield</p>

Cables with M12 Connectors Shield Strengthening Cables specification

For details, refer to page 7.

- Cable specification with strengthened shield for higher noise resistance. Recommended for EtherCAT communications.
- In addition to a double shield structure, copper foil tape is added to the M12 connector to improve communication characteristics (see below).

Shield Strengthening Cable (Double shield structure + copper foil tape wrapping)	
<p><Internal structure></p> 	<p>Noise resistance is strengthened by wrapping copper foil tape around the part where the cable in the M12 connector joins the shield plate.</p> 

Shield Effectiveness Data for Rugged RJ45 Connectors and M12 Connectors (Waterproof)

The following data is the results of OMRON testing. Shield effectiveness may vary for your environment and application conditions.

● Comparison of Shield Effectiveness with Product without a Double Shield

The following table shows the differences with a structure without a double shield. Higher numeric values show greater shield effectiveness.

Shield structure	Frequency (MHz)				
	0.5	1	5	10	30
Product with single shield	53 dB	49 dB	35 dB	25 dB	17 dB
Product with a double shield (XS5□-T, Category 5E)	61 dB	58 dB	43 dB	31 dB	27 dB

Assembly Procedure

● RJ45 Assembly Connectors

XS6G-T421-1

1. Pass the cable through the cable clamp and the connector housing
2. Strip the cable sheath and ground braiding to the correct lengths.
3. Follow the color codes and prepare to insert the wires into the splice piece.
4. Insert the wires into the splice piece for the length of the splice piece.
5. Place the splice piece into the RJ45 data module and engage it.
6. Place the data module and the splice piece on the IDC assembly housing.
7. Press the data module and the IDC assembly housing together and use pliers or a similar device to make the insulation displacement contact.
8. Remove the data module from the IDC assembly housing.
9. Place the upper screen plate on the data module and press it over the ground braiding of the cable.
10. Place the lower screen plate on the bottom of the data module, align it with the upper screen plate, and latch it until you hear it click into place.
11. Slide the housing that you placed around the cable in step 1 up to the data module and latch it until you hear it click into place.
12. Tighten the cable clamp.

Pin Assignments

Pin Assignments for Fast Ethernet 10/100 Mbps

Function/Signal	Wire color			Pin No.
	Industrial Ethernet	EIA/TIA 568A	EIA/TIA 568B	
Transmission Data+/TD+	YE	WH/GN	WH/OG	1
Transmission Data-/TD-	OG	GN	OG	2
Receiver Data/RD+	WH	WH/OG	WH	3
Receiver Data/RD-	BU	OG	GN	6

● M12 Panel-mounting PCB Straight Terminals

XS5P-T426-1

Confirming the Number of Parts

The following four parts are included in the package when it is delivered.

Panel-mounting Parts

1. Anchor

2. O-Ring

3. Nut

PCB-mounting Part

4. Connector

Assembly Procedure

1. Mount the connector to the PCB.

2. Attach the anchor to the panel with the nut.

Mounting the Connector to the PCB

Mounting the Anchor to the Panel

3. Attach the connector that you mounted to the PCB to the panel.

* Make sure that the connector and anchor are oriented correctly.

Attachment

4. Temporarily mount the O-ring to the top of the connector at the mating surface.

Temporary Mounting of the O-Ring

5. Mate the Connector Waterproof Cover (XS2Z-22, sold separately) or the Partner Connector Plug (XS5H-T42□-□M0-K, sold separately) and press the O-ring to the O-ring position after mounting.

Mounting the O-Ring

● Connector Waterproof Cover (Sold Separately)

XS2Z-22

* Tightening torque: 0.39 to 0.49 N·m

■ Safety Precautions

Precautions for Correct Use

Do not use the Connectors in an atmosphere or environment that exceeds the specifications.

● Connector Connection and Disconnection

- When connecting or disconnecting Connectors, be sure to hold the Connectors.
- Do not hold the cable when disconnecting Connectors.
- When joining Connectors, be sure to insert the plug all the way to the back of the socket before attempting to lock the Connectors.
- Do not use tools of any sort to join the Connectors. Always use your hands. Pliers or other tools may damage the Connectors.

● Wiring

Lay the cables so that external force is not applied to the Connectors. Otherwise, the degree of protection (IP67) may not be achieved.

● Degree of Protection for M12/Smartclick Connectors

- The degree of protection of Connectors (IP67) is not for a fully watertight structure. Do not use the Connectors underwater.
- Do not step on or place any objects on the Connectors. Doing so may damage the Connectors.

● Handling Precautions

- Do not pull on the Connectors or cables with excessive force.
Do not install the Connectors with a load placed directly on the joint or at the point where the wires connect to the Connector. The Connector may be damaged or the wires in the cable may be disconnected.
- Lay the cable where it will not be stepped on to prevent the wires in the cable from being disconnected and to protect the Connectors from being damaged. If the cable must be placed where it will be stepped on, install a protective cover.
- When bending cables, do not exceed the cable specifications.
