

FilesThruTheAir™ App

For use with EasyLog WiFi Hardware & Cloud

For EasyLog WiFi users on the go, download the FilesThruTheAir™ Apps available from GooglePlay and the App Store.

The FilesThruTheAir™ App extends cloud access and visibility to phone and tablet users, delivering an optimised experience and features otherwise unavailable via the traditional mobile web interface.

Features

- Easy to access and monitor your devices on the go
- View all device data live
- View data in graphical and tabular format
- Notification of all units in alarm mode

iPhone & iPad

View all devices and their readings in real time

View real-time graphs of all sessions

View, comment and close events

View devices that go into alarm

Android Phones & Tablets
