
EKS-A-K1YEWT32-EU (ORDER NO. 094840)

Electronic-Key read/write

- ▶ Memory 116 bytes E²PROM (programmable) plus 8 bytes ROM (serial number)

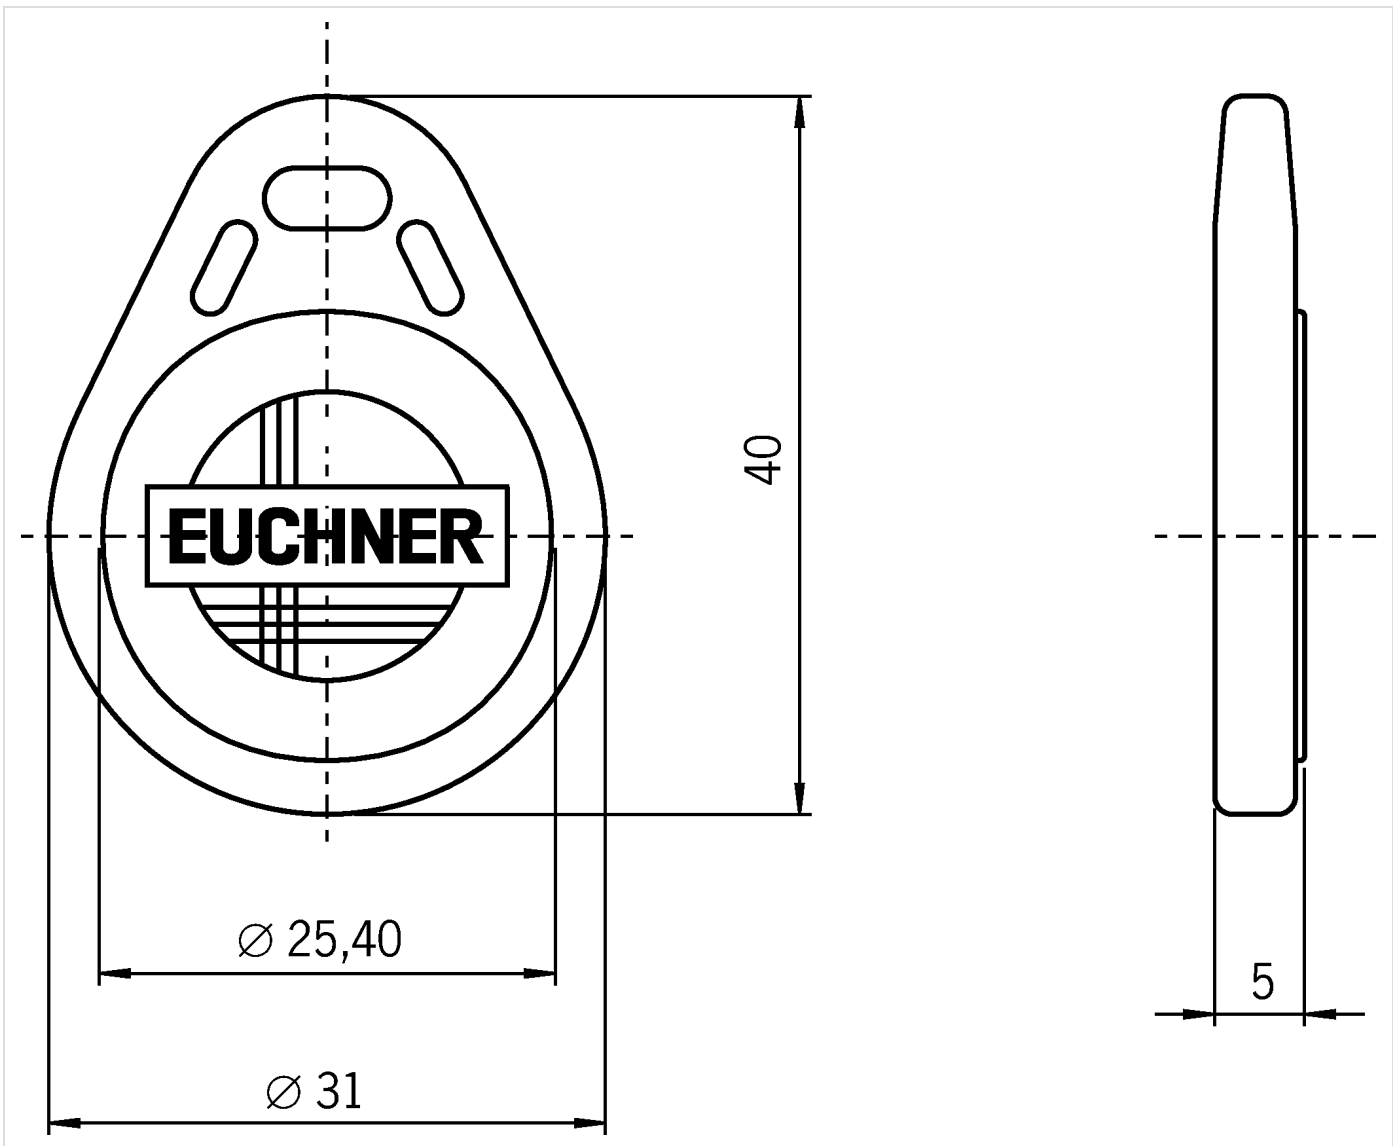

Description

Special features

- ▶ The Electronic-Key contains a unique 8-byte serial number. This number is written by laser during the Electronic-Key production process and is stored absolutely indestructibly. The serial number is used for secure distinction of every single Electronic-Key.

Dimension drawings

Technical data

Electrical connection ratings

Data retention time	max. 10 y at +55°C
Length of serial number	8 B (Serial number read only)
Number of read cycles	not limited
Number of write cycles	max. 100000
Power supply	Inductive via key adapter
Storage capacity	116 B read/write

Mechanical values and environment

Ambient temperature	-20 ... +60 °C
Degree of protection	IP65/IP67
Material	
	Housing ABS, yellow
