

Benefits

Features of 5SY miniature circuit-breakers

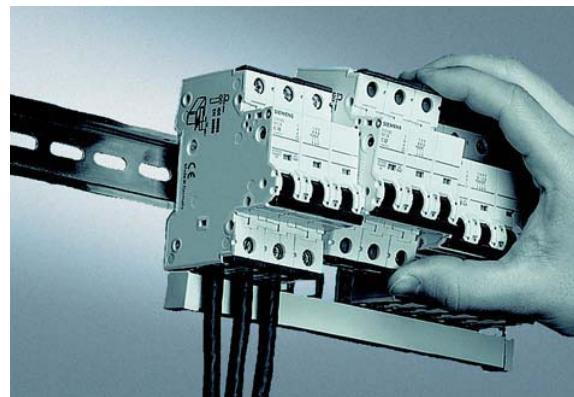

Easier, faster, enlarged wiring space

- Identical top and bottom terminals
- Connection of feeder cables vis-à-vis of the busbar
- Enlarged and easily accessible wiring space for the feeder cables
- Comfortable insertion of the feeder cables into the terminal
- Defined, visible and controllable connection of the feeder cables
- Universal infeed with top and bottom busbar mounting options.

Touch protection with clear advantages

- Integrated movable terminal covers located at the feeder cable input section
- The terminals are completely closed when screws are fully tightened
- Effective touch protection, also when the device is fully grabbed
- The requirements specified in the German VBG 4/BGV A2 accident prevention regulations are exceeded by far.

Flexible and no use of tools required

- Manually operable quick-assembly and disassembly systems not requiring the use of tools
- Fast assembly and disassembly of the 5SY miniature circuit-breakers to and from the standard mounting rail acc. to EN 60175
- All devices can be easily and comfortably replaced at any time.

Removal from the assembly

Thanks to the combination of the various features stated above, the 5SY miniature circuit-breakers can be easily and rapidly removed from the assembly when circuits need to be changed - with these devices, a removal of the busbar is no longer necessary.

BETA Miniature Circuit-Breakers

Industry Product Range

6 kA
70 mm mounting depth

2

Area of application

- U_n : AC 230 V, 50-60 Hz
- Standards: EN 60898, DIN VDE 0641 Part 11, IEC 60898

Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

Benefits

Auxiliary switch (AS)

- Can be retrofitted individually
- Mounting with factory-installed clips
- max. contact loading acc. to DIN VDE 0660 Part 200, EN 60947-5-1:
6 A, AC 230 V, AC-15
1 A, DC 220 V, DC-13
- Short-circuit protection ensured by circuit-breakers with characteristic B or C with $I_h = 6$ A or fuse gL 6 A
- Conductor cross-section 0.5 to 2.5 mm²

Functions

- Remote indication of the miniature circuit-breaker's switching state: AS: ON/OFF
- Connectable to *instabus EIB* and AS-Interface bus via binary inputs.

1) Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and $I_n = 40$ A is recommended.

All 5SY6 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see page 2/57.
For accessories, please see pages 2/60 and 2/61.

1) Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and $I_n = 40$ A is recommended.

All 5SY6 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see page 2/57.
For accessories, please see pages 2/60 and 2/61.

BETA Miniature Circuit-Breakers

Industry Product Range

10 kA
70 mm mounting depth

2

Area of application

- U_n : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted.

- Protection of measuring circuits with converters
- Protection of circuits with large cable lengths and a requirement for off-switching after 0.4 s acc. to DIN VDE 0100 Part 410.

Characteristic A

- For limited semiconductor protection

Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

1) Only applicable for 5SY4 332-6:

Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and I_n = 40 A is recommended.

All 5SY4 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

Industry Product Range

10 000
3

10 kA
70 mm mounting depth

2

Area of application

Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

Characteristic D

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

You can order this amount or a multiple of this amount.

1) Only applicable for 5SY4 332-7 and 5SY7 132-6:

Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and $I_n = 40$ A is recommended.

Please note for pages 2/47 and 2/48:

All 5SY4 and 5SY7 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

The following cross-references and footnotes apply for pages 2/47 and 2/48:

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

BETA Miniature Circuit-Breakers

Industry Product Range

15 000
3

15 kA
70 mm mounting depth

2

Area of application

- U_n : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted.

Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

Please see the footnote on page 2/49.

15 000

3

BETA Miniature Circuit-Breakers

Industry Product Range

15 kA

70 mm mounting depth

2

Area of application

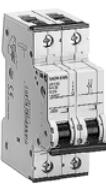

Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.,).

Characteristic D

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

The following footnotes apply to pages 2/48 and 2/49:

- 1) Only applicable for 5SY7 132-6 and 5SY7 132-7:
Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and $I_n = 40$ A is recommended.

All 5SY7 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

* This quantity or a multiple thereof can be ordered.

1) Only applicable for 5SY7 332-7:

Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and $I_n = 40$ A is recommended.

All 5SY7 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

BETA Miniature Circuit-Breakers

Industry Product Range

25 kA

70 mm mounting depth

2

Area of application

- U_n : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60 947-2, IEC 60 947-2
- Supplementary components can be retrofitted.

Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

Characteristic D

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

1) Only applicable for 5SY8 332-7:

Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic C and $I_n = 40$ A is recommended.

70 mm mounting depth

2

Area of application

- U_n : 230/400 V, 50-60 Hz, 220 V DC per pole, applicable in networks up to: AC 250/440 V
 - 220 V DC: 1-pole
 - 440 V DC: 2-pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted.

Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

1) Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of 5SY-6/7 miniature circuit-breakers with $I_n = 40$ A is recommended.

The terminal section indicates the DC polarity value which must essentially be observed during connection.

For supplementary components, please see pages 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

BETA Miniature Circuit-Breakers

High-Current Product Range

10 000
3

10 kA
70 mm mounting depth

2

Area of application

- U_n : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, IEC 60898, DIN VDE 0641 Part 11, EN 60204
- Supplementary components can be retrofitted individually
- Main control switch characteristics acc. to EN 60204
- Can be snapped onto standard mounting rail acc. to EN 60175
- Can be screwed onto bases
- As main control and miniature circuit-breaker in non-residential and industrial buildings.

Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

Characteristic D

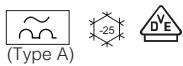

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

BETA Miniature Circuit-Breakers

Supplementary components

Auxiliary switches, fault signal contacts
70 mm mounting depth

2

Benefits

- Can be individually retrofitted¹⁾
- Mounting with factory-installed clips
- Short-circuit protection via miniature circuit-breakers of characteristic B or C and $I_h = 6 \text{ A}$ or gL 6 A fuses.
- Broad range of applications thanks to the additional version for controlling programmable controllers (PLC) acc. to EN 61131-2
- Connectable to *instabus EIB* and AS-Interface bus via binary inputs.

Auxiliary switches (AS) and fault signal contacts (FC)

5ST3 0.0

5ST3 0.1

5ST3 0.2

- Max. contact load:

NO contacts:

BETA Miniature Circuit-Breakers

Supplementary components

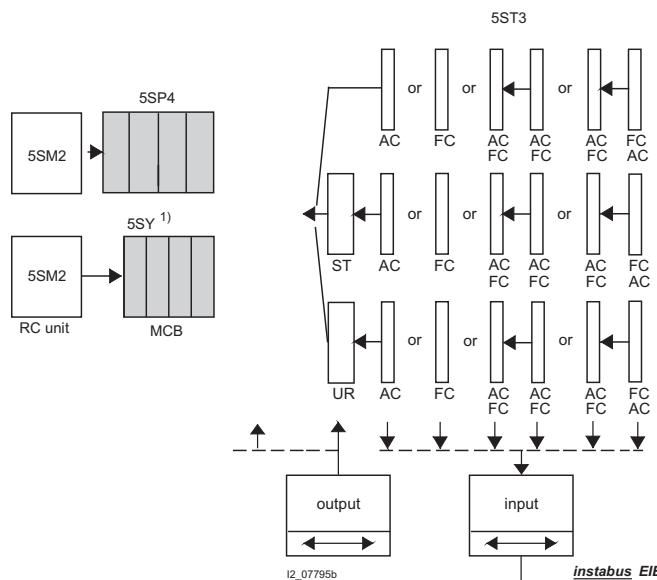

**Auxiliary switches, fault signal contacts
70 mm mounting depth**

2

Design

Retrofitting concept

According to the retrofitting concept, all 5ST3 supplementary components can be combined with miniature circuit-breakers from the 5SY¹⁾ and 5SP4 series:

Benefits

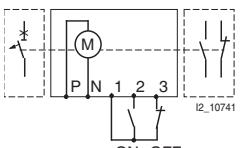

Remote-controlled operating mechanism

- Can be retrofitted individually²⁾
- Mounting with factory-installed clips
- Can be mechanically locked
- Supplementary components can be retrofitted
- Function selector switch on the front
- Connectable to *instabus EIB* and AS-Interface bus via binary inputs and outputs
- $U_n = 230 \text{ V}, 50 \text{ to } 60 \text{ Hz}$

Functions

- Remote switching ON/OFF of the miniature circuit-breaker and ON of the RCCB module
- In the case of fault conditions, remote on-switching is possible after acknowledgement
- Manual switching on site is possible
- Remote display of the switching status of the remote-controlled operating mechanism and the miniature circuit-breaker

Selection and ordering data

BETA Miniature Circuit-Breakers

Supplementary components

Shunt trips, undervoltage releases
70 mm mounting depth

2

Area of application

Shunt trip¹⁾

- Response limits acc. to DIN VDE 0660 Part 100, 7.2.1.4
- Suitable for voltages: Connectable to the *instabus EIB* and the AS-Interface Bus via binary outputs AC 110 to 415 V, DC 110 V, AC/DC 24 to 48 V.

Functions

Remote tripping of the miniature circuit-breaker.

Selection and ordering data

| | MW | DC | Order No. | Pack. unit* | Weight per unit approx. kg |
|---|---------------|----|-----------|-----------------|-------------------------------|
| Shunt trip (ST) for 5SY²⁾, 5SP4 miniature circuit-breakers | | | | | |
|  | AC 110-415 V | 1 | A | 5ST3 030 | 1 0.098 |
| | AC/DC 24-48 V | 1 | A | 5ST3 031 | 1 0.098 |

Area of application

Undervoltage release¹⁾

- Response limits acc. to DIN VDE 0660 Part 100, 7.2.1.3
- Suitable for voltages:
AC 230 V
DC 110 V
DC 24 V
- Connectable to *instabus EIB* and AS-Interface bus via binary inputs.

Functions

- Applicable as remote trip in an EMERGENCY-OFF loop
- Assures disconnection of the control circuit acc. to EN 60204
- In cases of interrupted or insufficient voltage, the undervoltage release trips the miniature circuit-breaker or prevents it from switching on.

Selection and ordering data

| | MW | DC | Order No. | Pack. unit* | Weight per unit approx. kg |
|--|----------|----|-----------|-----------------|-------------------------------|

BETA Miniature Circuit-Breakers

Accessories

for 70 mm mounting depth

2

Selection and ordering data

| | DC | Order No. | Pack. unit* | Weight per unit approx. kg |
|---|---|-------------------|-------------|----------------------------|
| Accessories for 5SY6¹⁾, 5SY4, 5SY7, 5SY8, 5SY5, 5SP4 miniature circuit-breakers | | | | |
|  | Handle locking device applicable with all types of poles; sealable against unintended on- and off-switching; padlock with a shackle of max. 3 mm | A 5ST3 801 | 1 | 0.008 |
|  | Terminal cover applicable with all types of poles; as an additional cover for screw openings; prevents removal of the device from the standard mounting rail; sealable | A 5ST3 800 | 10 | 0.001 |
|  | Padlock for 5ST3 801 handle locking device | A 5ST3 802 | 1 | 0.027 |
| | Locking device consisting of 5ST3 801 handle locking device and 5ST3 802 padlock | A 5ST3 803 | 1 set | 0.035 |

1) Not for 5SY6...-KV

for 55 mm and 70 mm mounting depth

Functions

Inscription labels

- Self-adhesive
- Inscription options:
- manually, with smear-resistant and water-proof markers
- via computer-controlled labeling system.

Benefits

- Saves time and costs
- Uniform and legible inscriptions
- Supports all types of inscription possibilities, including special characters
- Easy data entry and program operation via interactive dialog.
